Vehicle package with first-aid kit

The **Vehicle Kit with First Aid Kit** combines in a single container the equipment needed to improve visibility in the event of an emergency stop and provides essential first aid supplies. It includes a **warning triangle, a high-visibility vest, a pair of gloves**, and a **first-aid kit designed for 2 to 4 people**.

The set is stored in a fabric case designed to remain in the vehicle. The **Velcro on the back** secures it in the trunk to prevent it from shifting during the trip, while the handle makes it easy to carry when the items need to be used outside the vehicle.

Warning Signs and First Aid Combined in a Single Kit

The kit combines two types of complementary equipment. The **warning triangle and high-visibility vest** help signal that the vehicle is stopped and improve the user's visibility, while the included first-aid kit provides the necessary supplies to treat common injuries.

The first-aid kit contains, among other items, bandages of various sizes, sterile gauze pads, elastic bandages, adhesive tape, cleaning products, saline solution, and the essential accessories needed for first aid. It also includes a survival blanket and a single-use chemical breathalyzer.

Technical Specifications

Vehicle Pack with First Aid Kit	
Type	Vehicle Safety and First Aid Kit
Kit Capacity	2 to 4 people
Case	Black fabric
Closure	Zipper
Carry	Handle
Secures in the trunk	Velcro on the back

Chlorhexidine cleansing wipes	2
70° alcohol swabs	2
Calendula-infused anti-bruise compresses	2
Drying lotion compresses	2
Sterile saline solution	1 packet
First aid booklet in 10 languages	1

A cover designed to stay in the trunk

The packaging keeps all the items together rather than scattered throughout the vehicle. The **Velcro on the back of the cover** helps secure it in the trunk, while the zipper protects the contents and allows for quick access.

The handle then allows you to carry the entire set out of the vehicle when the warning triangle needs to be set up or when the first-aid kit is needed. This format is particularly suitable for **commercial vehicles, utility vehicles, emergency response vehicles, or service vehicles** that need to keep their equipment easily accessible.

A kit that goes beyond basic warning equipment

The warning triangle and high-visibility vest meet the vehicle's signaling needs and ensure the user's visibility. The addition of the **first-aid kit for 2 to 4 people** also provides the necessary supplies for minor wounds, cuts, bruises, or eye injuries that may occur during a business trip.

The breathalyzer included in the kit is an additional item. It is **not** currently **required in cars in France**, unlike the high-visibility vest and the warning triangle.
