Semi-rigid vehicle emergency kit for 2 to 4 people

The **2- to 4-Person Vehicle First Aid Kit** is designed for professionals who regularly work off-site and want to keep first aid supplies right in their vehicle. It combines, in a compact format, the supplies needed to treat minor injuries that may occur during a trip, a delivery, or an on-site assignment.

Its contents allow you to treat minor cuts, protect a wound, secure an area with a bandage, clean an affected area, or rinse an eye. A survival blanket, gloves, and essential first-aid accessories round out the kit.

Equipment tailored for professionals on the go

Drivers, technicians, maintenance workers, sales representatives, or field service teams may find themselves working far from the first-aid supplies available at their usual work locations. Keeping a dedicated **first-aid** kit in the vehicle ensures that **first-aid supplies** are **immediately available while on the road**.

Its capacity for **2 to 4 people** is particularly well-suited for vehicles used by a small team or shared by several employees throughout the day.

Technical Specifications

Vehicle First Aid Kit for 2 to 4 People	
Capacity	2 to 4 people
Material	Polypropylene (PP)
Color	White
Carry handle	Included
Dimensions	240 × 205 × 48 mm
Weight	350 g

What’s in the first-aid kit?

The kit includes various sizes of bandages and the necessary supplies to apply them, as well as products for cleaning and minor first aid. It also includes saline solution for rinsing, a survival blanket, and basic medical

instruments so you can provide care without having to gather multiple items separately.

Contents	Quantity
Emergency blanket	1
Single-use chemical breathalyzer	1
Adhesive bandages, 20 × 72 mm	10
Adhesive bandages, 53 × 70 mm	4
Adhesive bandage, 10 × 6 cm	1
Pack of 5 sterile compresses, 7.5 × 7.5 cm	1
Elastic bandages, 3 m × 5 cm	2
Tear-off adhesive tape, 5 m × 2 cm	1 roll
Lister scissors, 15 cm	1 pair
Flat-jaw splinter forceps	1
Disposable gloves	1 pair
Chlorhexidine cleansing wipes	2
70° alcohol swabs	2
Calendula-infused anti-bruise pads	2
Drying lotion compresses	2
Sterile saline solution	1 packet
First aid booklet in 10 languages	1

A flat design to minimize bulk on board

Measuring **240 × 205 × 48 mm**, the case is slim, making it easy to store in a vehicle. It can be kept in a trunk or a suitable compartment without taking up as much space as a first-aid kit designed for a larger group.

The **built-in handle** allows you to quickly remove it from the vehicle and carry all the equipment to the location where care is needed.

To be used in conjunction with the vehicle’s safety equipment

This case is designed for **first aid**. It therefore does not replace other equipment that may be on board, such as a high-visibility vest or a warning triangle.

It thus offers a different solution from the Complete Vehicle Pack: it is intended for users who already have their own warning equipment and are primarily looking for a **compact kit dedicated to medical care**.

Check the kit between trips

In a shared vehicle or one used daily, the contents may be used without all users being immediately aware of it. It

is therefore advisable to periodically check the kit to **replace any used or expired supplies** and ensure it remains fully stocked before the next trip.

This check is particularly important for service or emergency response vehicles used consecutively by multiple employees.
