Welding Restock Kit for 10 to 20 People

The **Welder Refill Kit** is designed to restock a first-aid cabinet for a team of **10 to 20 people**. Its contents are tailored to situations encountered in welding, sheet metal fabrication, and metalworking, with supplies to treat minor cuts, apply pressure, care for minor burns, or provide eye care.

It also includes several items suited for manual work on metal parts, such as **fingertip bandages, flat-jaw splinter tweezers, and a leather finger guard**.

A kit tailored for hot work

Welding and metal fabrication operations may involve handling parts, sharp edges, and hot surfaces. The kit therefore includes several categories of supplies rather than being limited to standard bandages.

In particular, it includes **12 bandages designed for minor burns**, available in two sizes, as well as compression bandages and sterile gauze pads to provide comprehensive wound care.

Kit Features

Welder's Restock Kit	
Number of People	10 to 20 people
Purpose	Welding, sheet metal work, and metal fabrication
Packaging	Cardboard packaging
Dimensions	200 × 120 × 70 mm
Weight	560 g

Contents of the restock kit

	20
	8
	4

Adhesive bandage, cut-to-size, 1 m × 6 cm	1
"Fingertip" adhesive bandages	8
Burn dressings 43 × 68 mm	6
Burn dressings, 67 × 110 mm	6
Sterile compression dressings	2
Individual sterile gauze pads, 20 × 20 cm	20
Elastic bandages, 3 m × 5 cm	2
Elastic bandages, 3 m × 7 cm	2
Tear-off adhesive tape, 5 m × 2 cm	1 roll
Lister scissors, 15 cm	1 pair
Flat-jaw splinter forceps	1
Disposable gloves	2 pairs
Leather finger guard	1
Chlorhexidine cleaning solution 50 ml	1 spray bottle
Wipes impregnated with hydroalcoholic solution	8
Sterile saline solution	10 sachets
Sterile eye pads	14
Sealed eye patches	5
First aid booklet in 10 languages	1

Special attention to the hands

Since hands are particularly stressed in welding and metalworking trades, the kit includes **8 specialized fingertip bandages**, several sizes of standard bandages, and a leather finger guard.

The flat-jaw splinter remover completes this kit for removing small, superficial particles, while the bandages and adhesive tape help secure a dressing when necessary.

Two sizes of bandages for minor burns

The kit contains **6 burn dressings measuring 43 × 68 mm and 6 measuring 67 × 110 mm**. These two sizes allow the protection to be tailored to the extent of the affected area without always having to use a large-size dressing.

This significant inclusion of burn dressings clearly distinguishes this kit from a general-purpose first-aid kit intended for an office or administrative setting.

A section of the kit dedicated to eye care

Welding and metalworking activities can also generate dust and sparks. To address this, the kit includes **10 single-use vials of saline solution, 14 sterile eye pads, and 5 sealed eye shields**.

These items allow you to keep a dedicated eye care kit in the cabinet, separate from the supplies intended for wounds and burns.

Restocking the cabinet without changing its specialization

When equipment intended for welders is supplemented with general-purpose supplies, certain specific items may gradually disappear from the inventory. This kit helps **restore a composition consistent with the occupational risks**, particularly burn dressings, finger protection, and eye care supplies.

It can be used during periodic inspections to replace used-up products, opened packages, or expired items, while retaining accessories that are still usable.
