Carpenter's Restock Kit for 10 to 20 People

The **Carpenter's Restock Kit** is designed to restock a first-aid cabinet for a team of **10 to 20 people**. It was designed for wood, aluminum, or PVC carpentry work, as well as for sawmills and cabinetmaking shops, where cutting, machining, and sanding operations can expose workers to a wide variety of injuries.

Its contents place a strong emphasis **on hand injuries, eye injuries from flying debris, and serious accidents involving cutting tools**. It therefore combines standard first-aid supplies with several more specialized items.

A Kit Tailored for Hand Injuries

Carpentry work places constant strain on the hands, particularly when handling workpieces, machines, or cutting tools. The kit includes adhesive bandages in various sizes, sterile compresses, and **6 sterile pressure bandages** to provide different levels of protection depending on the injury.

A **leather finger splint**, a splinter remover, elastic bandages, and adhesive tape round out the kit when the affected area requires additional protection or support.

Kit Features

Carpenter’s First Aid Refill Kit	
Capacity	10 to 20 people
Intended Use	Wood, aluminum, or PVC carpentry; sawmills and cabinetmaking
Packaging	Recyclable cardboard packaging
Weight	1.35 kg

Contents of the restock kit

	1
	1
	1

Hemostatic pad	1
Adhesive bandages, 20 × 72 mm	30
Adhesive bandages, 53 × 70 mm	12
Adhesive bandages 10 × 6 cm	8
Adhesive bandage, cut-to-size, 1 m × 6 cm	1
Sterile pouches containing 5 adhesive sutures	2
Sterile compression dressings	6
Sterile individual gauze pads, 20 × 20 cm	20
Elastic bandages, 3 m × 5 cm	3
Elastic bandages, 3 m × 7 cm	3
Tear-off adhesive tape, 5 m	1 roll
Lister scissors, 15 cm	1 pair
Splinter Remover	1
Disposable gloves	3 pairs
Leather finger guard	1
Chlorhexidine cleaning solution 50 ml	1 spray bottle
Saline solution, 100 ml	1 bottle
Sterile saline solution	40 single-use doses
Sealed eye shields	20
First aid booklet in 10 languages	1

Enhanced equipment for eye injuries

This kit stands out for its extensive supply of eye-rinsing supplies: **40 single-use vials of saline solution, a 100-ml bottle, and 20 sealed eye wash cups**. This equipment is particularly useful in environments where dust, wood shavings, or small particles may be generated during sawing, sanding, or machining.

This section of the kit provides several eye-rinsing solutions directly in the first-aid cabinet, without limiting the contents to just cut care.

Also prepare for accidents involving cutting tools

Farmor includes in this kit a **set designed for the recovery of a severed limb**. It includes, in particular, a 3-compartment insulated pouch, an instant cold pack, and a hemostatic pad.

This kit thus provides additional specialized equipment for workshops using cutting machines or tools, while retaining the standard first-aid supplies.

Adhesive sutures to complement standard bandages

The kit also contains **2 sterile pouches, each with 5 adhesive sutures**. These complement the wide variety of bandage sizes included in the kit and represent a notable difference from several other industry-specific restocking kits.

With 30 20 × 72 mm bandages, 12 53 × 70 mm bandages, and 8 10 × 6 cm bandages, the kit also offers several options for tailoring protection to the size and location of the wound.

Maintaining a First-Aid Cabinet Truly Suited for Carpentry

When restocking a first-aid cabinet, replacing only the most commonly used supplies can gradually lead to the disappearance of equipment specific to the carpentry trade. This kit, on the other hand, helps **restore a selection that is consistent with the risks encountered in carpentry**, particularly for the hands, eyes, and accidents involving cutting tools.

It can be used during periodic inspections to replace products that have been used up or have expired, while retaining equipment that is still usable.
