

100 Lungs for " manikin " Basic Buddy

Basic Buddy Lung Bags – Pack of 100 for CPR training manikin

Basic Buddy lung bags are replacement consumables designed for use with **Nasco** Healthcare's Basic Buddy training manikins. Available in **packs of 100**, they allow training organizations and instructors to maintain a stock of lung bags for their cardiopulmonary resuscitation (CPR) training sessions.

Listed as **LF03696** by the manufacturer, these lung bags provide a restocking solution for organizations that use Basic Buddy training manikins in their educational programs.

Lung Bags for Basic Buddy “ manikins ”

manikins Basic Buddy manikins are used in first aid and cardiopulmonary resuscitation (CPR) training. Lung bags are among the consumables associated with the use of this training equipment.

Replacing these consumables ensures that the manikin is ready for various training sessions, in accordance with the manufacturer's usage and maintenance recommendations.

Pack of 100 lung bags for CPR training

The **100-count package of lung bags** is particularly beneficial for organizations that regularly conduct first aid training sessions.

In particular, it allows organizations to build up a stock of consumables for:

- First aid training organizations
- Workplace First Aid Training Centers
- First aid associations
- Educational institutions that use CPR training manikins
- In-house training departments of companies and local governments

A training aid for learning cardiopulmonary resuscitation

CPR training relies on practical exercises that allow learners to become familiar with resuscitation techniques. Training manikins enable the reproduction of training scenarios in a training environment.

Basic Buddy replacement lung bags are used to prepare and maintain the equipment used during these exercises. They must be used with compatible training manikins and in accordance with Nasco Healthcare's instructions.

Why stock replacement lung bags?

When an organization regularly uses first-aid manikins, the availability of consumables is essential to ensuring the continuity of training sessions.

The **pack of 100 Basic Buddy lung bags** allows you to plan ahead for replacement needs and minimize interruptions caused by a shortage of supplies when preparing for training sessions.

Check compatibility with your first-aid manikin

Before ordering, it is important to verify that the manikin you are using is part of the **Basic Buddy line** and that part number **LF03696** corresponds to the consumable you are looking for.

These lung bags are offered as replacement parts for the range specified by Nasco Healthcare. Their compatibility with other models of the " manikins " has not been confirmed in the manufacturer's product specifications.

MMF, a supplier of first aid training equipment and consumables

MMF supports training and first-aid professionals in equipping and maintaining their instructional materials. The **Basic Buddy LF03696 lung bags, sold in packs of 100**, help replenish the supplies needed for hands-on cardiopulmonary resuscitation (CPR) training.
