Landscape Maintenance Emergency Kit for 4 to 6 People

Maintenance work on green spaces involves handling tools, working with vegetation, moving around the site, and constant exposure to the outdoor environment. As a result, a cut, a splinter, a blow, a sting, or something flying into the eye can all occur during a single workday.

The **Green Spaces First Aid Kit for 4 to 6 people** contains supplies tailored to these situations and sized for a small team. It is particularly suitable for **landscapers, gardeners, road maintenance workers, green space maintenance staff, and professionals working on outdoor job sites**.

A first-aid station for a team of 4 to 6 people

Unlike a small first-aid kit intended to be carried by an individual, this kit can be installed in a **fixed location known to the team**. Its wall mount allows it to be positioned, for example, in a workshop, a storage area, a utility room, or a converted vehicle.

However, its handle allows it to be carried when first-aid supplies need to be brought closer to the work site.

Kit Features

Landscaping First Aid Kit for 4 to 6 People	
Capacity	4 to 6 people
Material	Polypropylene
Color	White
Shipping	Handle
Installation	Wall mount
Mounting hardware included	Screws and anchors
Dimensions	250 × 190 × 90 mm
Weight	880 g

Enhanced supplies for cuts and bleeding

Pruning, cutting, and maintenance tools put hands at particularly high risk of injury. The kit therefore includes adhesive bandages in various sizes, sterile compresses, and a spray bottle of chlorhexidine cleansing solution.

For bleeding that requires more than just a bandage, the kit also includes **2 sterile pressure bandages and Coalgan® hemostatic wicks.**

Kit Contents

Contents	Quantity
Emergency blanket	1
Triangular bandage	1
Adhesive bandages, 20 × 72 mm	10
Adhesive bandages, 53 × 70 mm	4
Adhesive bandage 10 × 6 cm	1
Sterile compression bandages	2
Sterile individual gauze pads, 20 × 20 cm	6
Elastic bandages, 3 m × 5 cm	2
Elastic bandages, 3 m × 7 cm	2
Tear-off adhesive tape, 5 m × 2 cm	1 roll
Lister scissors, 15 cm	1 pair
Flat-jaw splinter forceps	1
Disposable gloves	2 pairs
Safety pins	12
Chlorhexidine cleaning solution 50 ml	1 spray bottle
70° alcohol swabs	5
Calendula-infused anti-bruise pads	5
Soothing compresses for insect bites	10
Waterless Hand Sanitizer	3 packets
Repair cream for minor burns and chapped skin	3 packets
Sterile saline solution	3 single-use doses
Sealed eye patches	2
Sterile Coalgan® hemostatic wicks	1 set of 2
First aid booklet in 10 languages	1

Insect bites and minor injuries related to outdoor work

A significant portion of the kit's contents is specifically designed for conditions encountered in green spaces. The kit contains **10 soothing compresses for insect bites**, as well as 5 calendula compresses for minor bumps.

Three packets of healing cream are also included for **minor burns and chapped skin**, while the hand sanitizer packets provide a hygiene solution when the worksite is far from a water source.

Rinse the eye quickly after exposure to splashes

Pruning, brush clearing, and vegetation maintenance can cause dust or small debris to be propelled into the air. For this reason, the kit contains **3 single-use vials of sterile saline solution and 2 sealed eye shields**.

This supply ensures that rinsing materials are immediately available near the team, without having to first go to a building or a distant first-aid station.

Support and protection are also provided

Elastic bandages, a triangular bandage, and adhesive tape round out the wound care supplies. A **survival blanket** is also included in the kit.

Finally, Lister scissors, splinter tweezers, safety pins, and gloves provide the necessary instruments for using the various items included in the kit.

A kit to keep accessible to the team

The wall mount clearly identifies the location of the first-aid supplies and prevents them from being stored with other equipment. At a site with a workshop or utility room, this fixed location makes it easily accessible to the entire team.

The contents must be checked regularly to replace used or expired supplies and to ensure the kit remains fully stocked to meet the team's needs.
