Multi-Purpose First Aid Kit for 50 People

When a single first-aid kit must meet the needs of a large group, the quantity and variety of supplies become essential.

The **Multi-Risk First Aid Kit for 50 People** is designed to equip units of up to 50 people. Its contents address various types of injuries and combine, in a single container **,** supplies for **wounds, bleeding, contusions, immobilization, thermal protection, hand hygiene, and eye irrigation**.

It is particularly suitable for businesses, workshops, industrial sites, local governments, technical facilities, and other professional environments with a variety of risks.

A comprehensive kit for multi-risk environments

The contents are not limited to a large quantity of bandages. They provide several levels of care, ranging from minor cuts to bleeding that requires more significant compression.

It includes, in particular **,** a **hemostatic pad, 4 sterile pressure dressings, and 3 packs of Coalgan® hemostatic wicks**, in addition to numerous sterile dressings and compresses.

Kit Features

Multi-Purpose First Aid Kit for 50 People	
Capacity	Up to 50 people
Material	Polypropylene
Color	White
Transport	Handle
Dimensions	395 × 300 × 103 mm
Weight	2.6 kg
Equipment Type	Comprehensive coverage

Drying lotion pads	15
Instant cold packs	3
Wipes saturated with hydroalcoholic solution	6
Sterile saline solution	20 sachets
Coalgan® sterile hemostatic wicks	3 packs of 2
First aid booklet in 10 languages	1

Multiple solutions for bleeding

The kit includes a variety of supplies for managing bleeding: sterile compresses, **4 pressure bandages**, a hemostatic pad kit **,** and **3 packs of 2 Coalgan® sterile hemostatic wicks.**

This variety ensures that the kit is not limited to treating only minor superficial cuts and is one of the key strengths of this multi-purpose first-aid kit.

Support, Securing, and Protection

Twelve elastic bands are available in three widths: 5, 7, and 10 cm. Two crepe bandages and two rolls of adhesive tape round out the supplies available for securing and supporting.

A **triangular sling** and two emergency blankets round out this section of the kit.

Bruises and Minor Injuries

A spray bottle containing **a calendula-based anti-bruise solution** is paired with **three instant cold packs**. These provide a quick source of cold without the need to store a cold pack in a freezer.

This setup is particularly useful in workshops, warehouses, or industrial sites where bumps and minor injuries can occur far from a first-aid station.

Hygiene and Instrumentation Also Included

Two chlorhexidine spray bottles provide a skin-cleaning solution, while the **6 compresses impregnated with hydroalcoholic solution** are intended for hand hygiene before treatment.

The case also contains 2 pairs of Lister scissors, 2 splinter removers, 5 pairs of disposable gloves, and 12 safety pins to provide the essential accessories needed for using the supplies.

A case designed for sites with a large workforce

Designed to serve a unit of up to **50 people**, this case is particularly well-suited for production facilities, warehouses, industrial sites, public institutions, technical facilities, or companies seeking to consolidate a large supply of supplies into a single unit.

Its handle allows it to be moved to the scene of an incident while keeping all the products together in a single container.

Regularly inspect a high-capacity supply kit

A case containing this many supplies must be inspected periodically to ensure that any used items have been replaced. Expiration dates, the integrity of sterile packaging, and the overall condition of the various products must also be checked.

Farmor also notes that this multi-risk kit was developed based on guidelines from various prevention organizations and advice from occupational physicians.
