PELI CRATE CR45 Waterproof Transport Case - 45 Liters

FAQ: Frequently Asked Questions About the PELI CRATE CR45

What is the ModRail™ system on the PELI CRATE CR45 used for?

The **ModRail™ system** integrated into the exterior of the case allows you to add compatible mounting accessories, including strap attachment points. This provides additional options for organizing and securing equipment during transport. ModRail™ accessories are sold separately.

Which case should I choose: the PELI CRATE CR45 or the CR90?

The **45-liter CR45** features a compact design, ideal for field kits, everyday tools, and small equipment. **The 90-liter CR90** offers more volume and a more elongated shape for bulky equipment or larger sets of gear. Both cases share the range's key protective and modular features.

How can I organize the interior of the PELI CRATE CR45?

The CR45 can be supplemented with a **divider kit** to create different compartments, an **interior tray** to organize small accessories, or a **MOLLE panel mounted under the lid**. These solutions allow you to customize the storage layout based on the equipment being transported. Accessories are sold separately, subject to availability.

Is the PELI CRATE CR45 suitable for emergency response and maintenance vehicles?

Yes, its **compact 45-liter size** makes it easy to assemble identifiable equipment kits and distribute gear throughout the storage spaces of a service, maintenance, or emergency vehicle. Its stacking system also makes it easy to organize multiple crates. However, **proper securing** is still necessary to keep them in place during transport.
