Multi-Purpose Emergency Kit for 6 to 8 People

The **Multirisques First Aid Kit for 6 to 8 people** provides a small team with a versatile set of supplies for injuries and incidents commonly encountered in the workplace, in a workshop, in an office, or in a utility room.

It is available in **two versions: ABS or polypropylene (PP)**. The first-aid contents are exactly the same in both cases. Only the material, dimensions, and weight of the kit differ.

ABS or polypropylene: two cases for the same contents

The **ABS** version features a harder, more rigid shell, while the **polypropylene** version is more flexible. Both models come with a handle and a wall mount, allowing the kit to be stored in a designated location and then carried to the scene of the incident.

Features	ABS	Polypropylene (PP)
Capacity	6 to 8 people	
First Aid Kit Contents	Same	
Material	ABS	Polypropylene (PP)

Waterless hand sanitizer	3 wipes
Sterile saline solution	4 doses
Coalgan® Sterile Hemostatic Tufts	1 set of 2
First aid booklet in 10 languages	1

A versatile kit for common first-aid needs

The **23 adhesive bandages**, 10 sterile compresses, and bandages are designed to treat minor cuts and superficial wounds. Two pressure bandages and 2 hemostatic wicks round out the kit for situations where bleeding requires more pressure.

The kit also includes supplies for minor bumps, small burns, and rinsing, including calendula, cream packets, and 4 doses of saline solution.

Which material should you choose?

The **ABS** version is particularly suitable when a hard, rigid shell is desired. The **polypropylene** version is lighter and more flexible.

The choice of material does not affect the first-aid contents: **the contents are identical in both versions**.
