Multi-Purpose Emergency Kit for 10 to 12 People

The **Multirisques First Aid Kit for 10 to 12 people** is designed to provide a medium-sized team with a complete set of first aid supplies.

It is available with an **ABS or polypropylene (PP)** case. Both versions contain exactly the same items; the choice therefore comes down primarily to the material and size of the kit.

Two cases with identical contents

An expanded supply for a team of 10 to 12 people

The kit includes **30 adhesive bandages in three sizes**, as well as 20 individual sterile gauze pads.

Two pressure bandages and 4 Coalgan® hemostatic wicks provide additional solutions when pressure is needed to stop bleeding.

Bandages in various widths for support

The 6 elastic bands come in widths of 5, 7, and 10 cm. A 10-cm crepe bandage and a roll of adhesive tape round out this part of the kit.

ABS or PP: the choice comes down mainly to the case

The ABS version is more compact in both length and width, with a sturdier shell. The polypropylene version is

wider and flatter, made of a more flexible material.

The supplies and their quantities remain the same regardless of the material chosen.
