Multi-Purpose First Aid Kit for 20 People

The **20-Person Multi-Purpose First Aid Kit** is designed for businesses, workshops, local governments, warehouses, or other workplaces that require a large quantity of first aid supplies.

It is available **in ABS or polypropylene (PP)**. Both versions contain the same general first-aid supplies and quantities, with the exception of the packaging for the hand hygiene product.

Two versions to adapt the container to the environment

Waterless hand sanitizer	6 units: pouches in the ABS version / compresses in the PP version
Sterile saline solution	10 doses
Coalgan® sterile hemostatic wicks	2 sets of 2
First aid booklet in 10 languages	1

Enhanced supplies for bleeding

The kit combines several complementary solutions: adhesive bandages, sterile gauze pads, **3 pressure bandages**, 4 Coalgan® hemostatic wicks, and a **hemostatic pad**.

This selection provides a higher level of equipment than a standard first-aid kit intended solely for minor cuts.

A substantial supply of support materials

The **9 elastic bands** come in three widths: 5, 7, and 10 cm. Two rolls of crepe bandage and two rolls of adhesive tape round out the kit.

ABS or polypropylene: what are the differences?

The ABS model features a harder, more rigid shell and measures **400 × 280 × 130 mm**. The polypropylene version is lighter and more compact in depth, measuring **400 × 260 × 100 mm**.

Both kits include the same general contents. The only difference in consumables relates to**waterless hand hygiene**: 6 pouches are included with the ABS version, compared to 6 wipes with the polypropylene version.

A fixed installation that remains easily transportable

Both models come with a wall mount to keep the kit in a designated location. Their handle allows the entire contents to be carried directly to the scene of an incident when necessary.
