SST First Aid Kit (Workplace First Aid Responder)

The **SST (Workplace First Aid Responder) first aid kit** contains, all in one container, the supplies needed for a first aid responder to provide initial care in the workplace.

Its multi-purpose kit includes supplies for wound protection, stopping bleeding, immobilization, treating minor injuries, and rinsing. It also includes several items that are particularly useful during an SST response, such as a **hemostatic pad, a mouth-to-mouth resuscitation mask, and an instant cold pack**.

A kit specifically designed for workplace first aid

This version differs from a standard multi-purpose first-aid kit in that its selection of supplies is more specifically geared toward **workplace first-aid** response.

The kit includes, among other items, several bleeding control devices, a survival blanket, a triangular sling, a mouth-to-mouth mask, and an instant cold pack.

Lister scissors, 15 cm	1 pair
Disposable gloves	2 pairs
Safety pins	12
Chlorhexidine-soaked compresses	6
Sterile saline solution	4 packets
First aid booklet in 10 languages	1

Protection, Stabilization, and Trauma Care

A survival blanket and a triangular sling round out the protection and support equipment. Four elastic bands in two different widths are provided to secure a compress or bandage.

The **instant cold pack**, meanwhile, provides a quick source of cold for certain minor injuries.

Mouth-to-mouth mask and emergency response equipment

The kit includes a **mouth-to-mouth mask** designed to supplement a first responder’s equipment during an emergency requiring resuscitation.

Two pairs of disposable gloves, Lister scissors, safety pins, and two plastic bags round out the accessories

included in the kit.

A wall-mounted kit that’s quickly accessible

The white polypropylene kit measures **250 × 190 × 90 mm**. Its wall mount allows it to be stored in a known and accessible location, while its handle makes it easy to carry to the scene of the accident.

The interior compartmentalized pouch helps keep the various items organized, making them easy to identify during an emergency.

Check the first-aid supplies regularly

The contents should be checked periodically to replace any consumables that have been used, are damaged, or have expired. The first-aid kit must also remain easily accessible to those who may need to respond to an emergency.
