Occupational Health Multi-Risk First Aid Kit

The **Multirisques Occupational Medicine First Aid Kit** allows you to consolidate a comprehensive set of first aid supplies for the workplace into a single container.

Its contents specifically address needs related to **cuts and bleeding, minor wounds, support and protection, eye injuries**, as well as the equipment commonly used during first aid procedures.

A kit designed to meet the needs of the workplace

This kit stands out for its particularly comprehensive contents, which include bandages, gauze pads, adhesive tape, compression supplies, and first-aid accessories.

It notably includes a **hemostatic pad** and **sterile hemostatic wicks**, as well as compresses in various sizes designed to protect wounds.

The contents are provided as a guideline to address various needs encountered in the workplace. The contents of a first-aid kit must be tailored to the specific risks of the facility and its operations.

Technical Specifications

Multi-Risk Occupational Health First Aid Kit	
Usage	First aid in the workplace
Material	Polypropylene (PP)
Color	White
Dimensions	320 × 280 × 119 mm

Safety pins	12
Chlorhexidine cleansing wipes	10
70° alcohol swabs	10
Coalgan® Sterile Hemostatic Tufts	1 pack of 2
Sterile saline solution	4 vials
First aid booklet in 10 languages	1

Enhanced supplies for cuts and bleeding

The kit includes several options to tailor treatment to the injury: **23 adhesive bandages**, 10 large sterile gauze pads, and 2 pouches, each containing 5 sterile gauze pads measuring 7.5 × 7.5 cm.

A hemostatic pad and 2 sterile Coalgan® hemostatic wicks round out this kit when more specialized bleeding management is required.

Bandages, Support, and Protection

Six elastic bandages are available in two widths: **5 and 10 cm**. They can be used with the gauze pads and adhesive tape to secure them in place.

Two triangular slings and a survival blanket round out the equipment available for protection and support during first aid.

Skin Cleansing and Eye Rinsing

Ten chlorhexidine-impregnated cleansing pads are provided for skin cleansing.

The kit also contains **4 single-dose vials of sterile saline solution**, specifically designed for occasional flushing in the event of a minor eye splash.

Instruments and Personal Protective Equipment

A 15-cm pair of Lister scissors, a splinter remover, 12 safety pins, and **5 pairs of disposable gloves** ensure that the main accessories needed during a procedure are readily available.

Ten compresses impregnated with 70° alcohol are also included for cleaning small instruments.

A wall-mounted case that remains portable

The white polypropylene case is equipped with a **wall mount**, allowing it to be stored in a known and accessible location within the facility.

Its handle then allows you to remove it from the wall and carry all the supplies directly to the area where first aid needs to be administered.

Adapt the kit to the workplace’s risks

The proposed contents provide a particularly comprehensive first-aid kit, but they must be tailored to the business’s operations, identified risks, and emergency response procedures.

The contents must be checked regularly to replace any supplies that have been used, damaged, or expired.
