Interior Divider Kit for PELI CRATE CR45

Customize the interior of your PELI CRATE CR45 to suit your needs

The PELI **CRATE CR45 interior divider kit** lets you organize the storage space in your 45-liter case by creating compartments tailored to the equipment you're transporting.

It makes it easy to separate tools, cables, technical accessories, and small field service equipment, **keeping everything organized and minimizing movement during transport**.

This solution is particularly useful for professionals who put together equipment kits for various activities: maintenance, technical inspections, safety, or field operations.

An interior layout that adapts to your equipment

The kit includes **two modular components** that can be used separately to create multiple storage spaces or assembled to form a single divider.

The dividers **can be installed and repositioned without tools**. This allows you to adjust the interior layout of your CR45 box whenever the equipment you're transporting changes, without any special modifications.

They can also be removed to free up interior space and accommodate equipment that requires more room.

MOLLE grids to enhance storage

Each divider features a **MOLLE attachment grid**, allowing you to add compatible pouches and accessories.

This feature lets you use the surfaces of the dividers to organize small items, while reserving the main compartments for larger tools and equipment.

Benefits of the CR45 Divider Kit

- **Compartmentalized storage:** creates distinct zones to separate different items of gear.
- **Customizable organization:** two components that can be used separately or assembled as needed.
- **Equipment stabilization:** minimizes movement of items inside the case.
- **Tool-free installation:** quick and easy setup and repositioning.
- **Removable design:** the dividers can be removed to create an open storage space.
- **Integrated MOLLE webbing:** compatible pouches and accessories can be added.

- **Dedicated compatibility:** Designed for the 45-liter PELI CRATE CR45.

FAQ: Frequently Asked Questions About the PELI CRATE CR45 Dividers

Is this kit compatible with the PELI CRATE CR90?

No. This divider kit is specifically designed for **the 45-liter PELI CRATE CR45**. The CR90 has its own kit, tailored to the dimensions of its interior space.

What is the difference between the interior dividers and the MOLLE lid panel?

The **CR45 dividers** are used to divide the case's main compartment into several sections. The **MOLLE lid panel**, on the other hand, allows you to attach compatible pouches and accessories under the lid. These two solutions can be combined to organize different storage areas.

Can the dividers be removed to transport larger equipment?

Yes. The dividers are **removable and can be installed without tools**. They can be removed to free up space inside the CR45 case when the equipment being transported does not require compartmentalization.

Are MOLLE pouches included in the kit?

The kit includes dividers equipped with MOLLE webbing. MOLLE pouches and other compatible MOLLE accessories are optional extras that must be purchased separately.
