

Rechargeable battery 2469P Peli™ NiMH : Set of 4 units

Peli™ NiMH battery for ATEX LED lamps

The Peli™ NiMH battery is specially designed to ensure optimum operation of Peli™ LED lamps, whether intended for ATEX zones (Zone 0 or Zone 1) or not. It provides a reliable and powerful power supply for your lighting fixtures, offering outstanding performance in high-demand environments. Rechargeable and available at a competitive price, this battery is a must-have choice for users of Peli™ LED lamps intended for hazardous areas.

Designed for applications in environments requiring enhanced safety, this NiMH rechargeable battery provides the energy needed for efficient lighting while complying with strict safety standards.

Specifications

- **Battery type:** NiMH (Nickel-Metal Hydride)
- **Voltage:** 1.2 V
- **Capacity:** 2000 mAh
- **Battery chemistry:** Nickel-Metal Hydride
- **Available sizes:** LR06 / AA
- **Number of charge cycles:** 500 to 1000 cycles
- **Service life:** Low degradation if correctly charged (no permanent charge)

- **Compatibility :**
 - 2460Z1 StealthLite™ rechargeable torch Atex Zone 1
 - 3660Z1 Little Ed™ rechargeable Atex Zone 1 bent lamp
 - 3765Z0 Atex Zone 0 rechargeable bent lamp
 - 2350 Peli™ tactical flashlight
 - 3310ELS Peli™ emergency lighting station

Advantages of Peli™ NiMH batteries for ATEX LED Lamp:

- **Increased power:** The Peli™ NiMH battery is 30% more powerful than the NiCd battery, guaranteeing superior performance for your Peli™ LED lamps.
- **Environmentally friendly:** NiMH technology contains no toxic products, making it more environmentally friendly and safe for the user.

- **Longevity:** Supports between 500 and 1000 charging cycles, making it a durable and cost-effective solution for extended use.
- **Enhanced safety:** Designed specifically for Peli™ lamps intended for ATEX zones, this battery offers safe power supply in sensitive environments.
- **Ease of transport:** unlike other battery technologies, transporting the Peli™ NiMH battery is not subject to any special regulations.

Use

The Peli™ NiMH battery is essential for the smooth operation of your Peli™ lamps in demanding environments. Whether for a torch or bent lamp in ATEX zones (Zone 0 or Zone 1), this rechargeable battery ensures a stable and reliable power supply, guaranteeing optimal and safe lighting. Its rugged design and ability to withstand a large number of charge cycles make it a must-have for professionals who use lamps in harsh conditions.

If you're looking for a reliable, powerful battery for your Peli™ LED lamps intended for ATEX zones, the Peli™ NiMH battery is the ideal choice. With its enhanced performance, longevity and safety, it guarantees constant, safe lighting in all your working environments. By opting for this rechargeable battery, you ensure that your lamp has extended autonomy and worry-free use in sensitive areas.
