

## Rechargeable LED spotlight PELI™ 9050

The **Peli 9050** represents the new generation of high-performance lighting. Designed to meet the needs of the most demanding professionals, it incorporates innovative technology and a unique flexible battery system. Combining light output, versatility and durability, this lamp is ideal for use in harsh environments and critical situations.

### Peli™ 9050 lamp features:

- **Light output:** up to **3,369 lumens** for optimum visibility.
- **Lighting modes:** spot, wide beam, spot+wide beam, flashing.
- **Flexible battery system**
  - Compatible with **Li-ion**, **AA alkaline** or **AA NiMH** battery packs.
  - **4 battery compartments** for extended autonomy or reduced weight.
- **Optimized charger station:** quick assembly and disassembly.
- **Adjustable rear lights:** adjustable colors (green, blue, red) via dedicated switch.
- **IP67 rating:** full protection against dust and temporary immersion in water.
- **Advanced ergonomics**
  - Switch activation with gloved hands.
  - Wide base for enhanced stability.
  - Battery life indicator switch.
- **Standards compliance:** **NFPA 1901** approved.

### Advantages :

1. **Energy versatility:** With its flexible battery system, the Peli 9050 adapts to your preferences and available resources.
2. **Outstanding performance:** A light output of 3,369 lumens ensures high-performance illumination for all tasks.
3. **Customization:** Varied lighting modes and colored rear lights increase efficiency and visibility.
4. **Extreme durability:** IP67-rated and NFPA-approved, it's designed to withstand the most extreme conditions.
5. **Ease of use:** ergonomic design ensures intuitive operation, even when wearing gloves or in emergency situations.

The **Peli 9050** redefines professional lighting standards thanks to its power, flexibility and robustness. Designed to last and adapt to all missions, it is the essential tool for demanding professionals. Put your trust in **Peli's** quality and innovation, and equip yourself with the 9050 lantern to face any situation, even the most critical.

## Use:

The Peli 9050 lantern is ideal for professionals working in complex environments, such as firefighters, rescue workers, construction site workers or law enforcement. Its lighting versatility and resistance mean it can be used in extreme conditions (bad weather, dusty environments, temporary immersion in water) and for night missions. It is particularly useful in emergency situations, where visibility and equipment reliability are crucial.

Combining outstanding performance features with rugged robustness, the Peli 9050 lamp is an essential choice for demanding professionals. Whether for rescue missions, construction sites or security operations, this lamp guarantees optimum efficiency thanks to its light output, flexible power supply and design that can withstand the harshest conditions. Peli continues to innovate to meet the needs of its users with reliable, high-performance products, and the 9050 lamp is proof of this.
