

Monitor nozzle AKRON TurboMaster 1745

Turbomaster 1745 head by Akron Brass: efficiency and adaptability for firefighting operations

In the fire-fighting sector, equipment performance and reliability are crucial. The **Turbomaster 1745** head by **Akron** Brass stands out for its ability to offer adjustable flow rates, making it ideal for a variety of intervention situations. **MMF Protection et Sécurité** is your authorized partner for this product.

Introducing the Turbomaster 1745 head

The **Turbomaster 1745** head is designed for optimum performance in demanding environments. Its construction in high-quality materials ensures exceptional durability and resistance, even under high pressure. Thanks to its precise flow settings, it enables controlled water distribution, essential for rapidly bringing fires under control.

	12, 2100, 2900 LPM (250, 400, 550, 760 GPM) at operating pressure, for optimum adaptation to different intervention situations.
	Allows easy switching between a powerful straight jet and a diffused jet, offering great flexibility in the field thanks to progressive control of the jet shape.
	Manufactured from Pyrolite, a lightweight, durable alloy, ensuring enhanced resistance to the demanding conditions of firefighting.
	Length of 241 mm, weight of 5.4 kg, for easy integration on various firefighting monitors.
	Adaptable to various firefighting monitors from the Akron Brass range, guaranteeing reliable use in all

circumstances.

Preferred contexts of use

The **Turbomaster 1745** head is particularly well-suited to operations requiring high jet power and precise water distribution. It is ideal for :

- **Industrial interventions:** adapted to industrial environments where fires can be intense and require a fast, powerful response.
- **Urban fires:** its ability to adjust the flow rate and shape of the jet means it can be used in a wide variety of urban settings.
- **Rescue operations in natural environments:** when used on all-terrain vehicles, it is ideal for fighting forest fires and rural wildfires.

Assets for professional use

The **Turbomaster 1745** head offers several key advantages for professionals:

- **Reliability and durability:** designed to withstand the most demanding environments, it guarantees long life and consistent performance.
- **Versatility:** thanks to its flow settings and precise jet control, it can be adapted to a variety of work situations.
- **Operational efficiency:** its ability to bring fires under control quickly reduces risks to responders and minimizes property damage.
- **Ease of integration:** compatible with a variety of firefighting monitors, it integrates easily with existing equipment, optimizing available resources.

MMF Protection et Sécurité your trusted partner

As an authorized reseller of the **Akron Brass** brand, Akron Brass, **MMF Protection et Sécurité** guarantees you authentic, high-quality products. Here's what we offer:

1. **Expertise and personalized advice:** our team is trained to guide you in choosing the equipment best suited to your specific needs.
2. **Authorized repair center:** we maintain and repair your **Akron Brass** equipment, using original parts to guarantee performance.
3. **Quality commitment:** we are committed to providing quality service, with fast and reliable interventions, to extend the life of your equipment.

In a nutshell

The **Akron Brass Turbomaster 1745** head is a wise investment for any fire safety professional. Its performance, durability and versatility make it an indispensable piece of equipment for efficient, safe interventions. At **MMF Protection et Sécurité** we are committed to providing you with the best service and products to keep you and your teams safe.
