

## Manikin heavy adult MK2

### Manikin MK2 Heavy Adult (70 kg, 1.83 m) : Realistic training

Equip yourself with the **Manikin MK2 Heavy Adult (70 kg, 1.83 m)** for safety training that faithfully reproduces conditions in the field. Used by firefighters, the UK Ministry of Defense and many emergency services around the world, this manikin guarantees effective, realistic training, essential for preparing professionals for critical situations.

#### Key features:

- **Robust design:** Made from flame-retardant polyester, it stands up to the harshest environments.
- **Anatomical weight distribution:** Simulates an unconscious casualty for a realistic experience.
- **Easy handling:** Equipped with a sturdy strap loop for easy transport.
- **Extreme resistance:** Able to withstand conditions such as crushing and falls.
- **Waterproof:** Water-resistant material, ideal for wet or hazardous scenarios.
- **Flexible joints:** Reduce the risk of injury during handling.
- **Adaptable immobilization and extraction collars:** Enable appropriate care during simulations.

#### Worldwide presence

The manikin MK2 can be found in 26 countries, including the USA, Germany and Australia, where it is used for large-scale safety training.

#### Why choose the manikin MK2 Adult Heavy?

The manikin MK2 Adult Heavy is ideal for professionals wishing to simulate realistic rescue situations. Its size and

weight faithfully reproduce an unconscious evacuee, which is essential for effective rescue training. Used by 100% of UK fire and rescue services, it is a testament to its reliability and effectiveness.

## Material advantages:

manikin is made from **flame-retardant polyester** fabric -the same material used in bullet-proof vests. This fabric is four times more resistant than traditional materials, offering exceptional durability. Thanks to its double seams and reinforced zones, it guarantees long life even in extreme training conditions. Its interior is soft and weighted with 2-4 mm aggregates to ensure anatomically correct weight distribution, maximizing training realism and safety.

## Integration into different training scenarios:

The manikin MK2 is designed for use in a variety of scenarios, such as confined spaces, chemical or biological hazards, and road accidents. It can withstand temperatures of up to 100°C, making it suitable for fire drills. In addition, accessories such as immobilization collars enable simulated casualty care for a complete training experience.

## Professional uses of manikin MK2 Adult Heavy

- The **Manikin MK2 Heavy Adult (70 kg, 1.83 m)** is an essential tool for simulating realistic rescue scenarios in a variety of professional sectors:
- **Fire and rescue:** Training in confined-space rescues, chemical or biological incidents, and road traffic collisions.
- **Medical and health teams:** Used by ambulances, EMS and HART (Hazardous Area Response Teams) to simulate the treatment and transport of victims.
- **Industry:** Emergency evacuation and workplace safety training.
- **Defense forces:** preparing soldiers for wartime emergencies.
- **Airport academies and maritime rescue:** Used for critical rescue simulations.

Offering an authentic and realistic training experience, the manikin MK2 is an essential choice for ensuring the safety and preparedness of emergency teams.
