

DEFIBRILLATOR ZOLL AED+ SEMI AUTOMATIC ELECTRODES CPRD ADULT

Discover the ZOLL AED+ Semi-Automatic Defibrillator with CPRD Electrodes

The ZOLL AED+ Semi-Automatic defibrillator with CPRD electrodes represents a significant advance in the field of rescue devices. Designed for rapid and effective use in the event of cardiac arrest, this third-generation device stands out for its ability to guide rescuers in real time through the cardiopulmonary resuscitation (CPR) process.

Cutting-edge technology for optimum intervention

- **Real CPR Help®:** Innovative technology providing real-time indications on the depth and frequency of compressions, ensuring effective CPR.
- **Clear voice prompts:** Instructions such as "press harder" or "good compressions" make intervention easier, even for non-technical users.
- **Comprehensive accessories:** Includes razor, gloves, scissors, insufflation mask and towels for fast, comprehensive response.

Why choose the ZOLL AED+ defibrillator?

Reliability and durability

- **Five-year** battery and electrode life, reducing maintenance requirements.
- **DAE Plus Trac™** management program (optional) ensuring constant device monitoring.

A solution for all environments

- Simplified use for **healthcare professionals** (doctors, nurses, paramedics).
- Ergonomic design for **first-aiders and volunteer rescuers** (firefighters, first-aid associations).
- Ideal for **businesses and public places**, offering a durable, cost-effective solution for the safety of employees and visitors.

Complete equipment for effective resuscitation

The ZOLL AED+ Semi-Automatic comes with:

- ? Pre-connected CPRD electrodes
- ? Carrying case
- ? Set of batteries and user manual

With the ZOLL AED+ defibrillator, you benefit from high-performance, intuitive equipment, guaranteeing fast, effective intervention in an emergency. Its adoption represents a strategic choice to improve safety and save lives.
