

Pedestal safety shower with eye wash station without basin 3872

Pedestal safety shower with washbasinless eyewash station

Discover the **free-standing safety shower with eyewash station**, an essential product for professional environments requiring reliable safety equipment.

Designed by **Krusman**, this safety station is made from **galvanized steel** tubing and features a **green/white striped** design. The shower head, in **powder-coated stainless steel**, ensures even water distribution for an efficient flow rate of around **76 liters per minute** at a pressure of **2.4 bar**.

The shower features an **open-hold ball valve**, which is easy to handle thanks to a **pull handle** and a **pull rod**, enabling simple activation even by a person in a low position. The **integrated 3830** eye washer features **individual spray heads** with flow control and filters, guaranteeing a flow rate of around **28 liters per minute**. What's more, the system is **self-draining**, preventing any water stagnation that might compromise hygiene.

Occupying a space **400 mm wide, 2320 mm high** and **790 mm deep**, this basinless safety shower is ideal for installation in a variety of industrial environments where safety is paramount. Weighing just **20 kg**, it is easy to install, while ensuring robustness and durability. Professionals opting for this model will also benefit from the **emergency light panels included** to ensure optimum visibility when needed.

The adoption of this type of equipment is crucial for companies wishing to comply with **safety standards** and offer their employees a safe and responsive working environment in the face of emergencies.

The **free-standing safety shower with eyewash station** is the ideal solution for professionals seeking to enhance safety in the workplace. Designed to provide rapid response in the event of an emergency, this safety station is both robust and efficient. It perfectly meets the requirements of demanding industrial environments, guaranteeing the safety of workers exposed to hazardous substances.

Features :

- **Durable construction** with galvanized steel pipes for maximum strength.
- **Self-draining design** for the eyewash mechanism, ensuring simplified maintenance.
- **Generous flow rate** of 76 l/min at 2.4 bar pressure, guaranteeing complete coverage in an emergency.
- **Stainless steel showerhead** with powder-coated finish for added durability.
- **Open ball valve control system**, easy to use thanks to its ergonomic pull handle.
- **Illuminated emergency warning signs** included for immediate visibility.

Potential users of the Safety Shower with Eye Wash Station

The walk-in safety shower with eyewash station without basin is an essential piece of equipment for a variety of professional sectors, guaranteeing employee safety in the face of chemical and thermal hazards.

Here are the different occupational categories that could benefit from using this product:

- **Chemical industries:** Chemical production plants often expose workers to potentially hazardous substances. A safety shower is crucial to quickly neutralize chemical splashes to minimize injury.
- **Laboratories:** In laboratories, where a variety of chemicals and reagents are handled on a daily basis, the

installation of this emergency wash station ensures that accidents such as eye splashes are quickly dealt with.

- **Manufacturing Plants:** Manufacturing workshops involving thermal or chemical processes can benefit from this shower and eyewash station to ensure an immediate and effective response in the event of an accident.
- **Construction sites:** Construction sites handling cement or other corrosive materials require quick access to a safety shower to guard against the dangers of harmful splashes.
- **Higher education establishments:** Universities and technical schools, particularly those with science and engineering departments, should incorporate the K 3872 shower to guarantee the safety of students and researchers during their experiments.

In conclusion, the versatility and effectiveness of the **K 3872 standing safety shower with eyewash station** make it indispensable for any work environment where the risk of hazardous exposure is present.
