

35-liter multi-kit first-aid bag

35-liter multi-kit first aid bag

This high-capacity, 35-liter Cordura first aid bag is specially designed to meet the needs of rescue professionals in emergency situations. Resistant, practical and modular, it can carry the essentials of first-aid equipment in a compact, highly functional format. Made from Cordura, a particularly robust material, it is highly durable, even in the most extreme conditions, while offering optimum organization of first-aid tools. Perfect for firefighters, first-aiders and other rapid-response professionals, this bag ensures rapid access and reliable protection of your equipment.

Benefits of the 35-liter first aid bag:

- **Large capacity with fast, full access:** This bag features a full front opening, allowing quick access to all contents, essential in emergency situations where every second counts. The main compartment is padded and semi-rigid, guaranteeing optimum protection for sensitive rescue tools while remaining lightweight for easy transport.
- **Modular, intuitive organization:** Featuring four inner trays measuring 25x16x12 cm, the bag includes several removable color-coded pockets, each equipped with handles and ID card holders. This removable pocket system makes it easy to identify contents and personalize the bag as required. A specific pocket, the yellow one, is dedicated to ampoule storage for optimal organization of medication.
- **Unrivalled carrying comfort:** with its two over-molded shoulder straps, this bag can be carried comfortably on the back, even on long journeys or during operations. Adjustable straps secure the bag at the chest and waist for greater stability. This intervention bag is designed for unobstructed transport, ensuring maximum comfort for rescue workers.
- **Professional-grade materials:** Made from Cordura 1100d tex, this bag is highly resistant to abrasion and tearing, ensuring durability even in the most extreme situations. The 210D PVC polyamide interior and high-quality YKK zipper ensure that your gear remains protected from the elements. Reflexite retro-reflective stripes add extra security by making the bag visible in low-light conditions.

Technical specifications:
