Manikin boys' baby bathers

Infant care dummy: Life-size infant for learning how to care for a baby

This life-size, male infant mannequin has been specially designed in collaboration with specialized childcare professionals to provide **comprehensive, realistic training** in infant care. Ideal for childcare students, healthcare professionals or hands-on training, this **realistic model** simulates many of the daily gestures and care essential in caring for a newborn.

Features :

- **Realistic model**: Life-size male infant, faithfully reproducing the proportions and physical characteristics of a real baby.
- **High-quality materials**: Made from durable, non-toxic materials that comply with safety standards.
- **Bathing possible**: Can be immersed in water up to 40°C, offering the possibility of practicing bathing gestures in complete safety.
- **Complete care simulations**: Allows you to simulate changing, bathing, feeding (liquid food), taking medication and urine sampling.
- **Rectal temperature taking**: Equipped for rectal temperature taking, essential for learning how to monitor an infant's temperature.
- **Complete physical examination**: Fontanelles and testicles can be examined, as well as babywearing, bedtime and daily care.
- **Realistic mobility**: Lightweight and easy to handle, this infant can be picked up and carried like a real baby, allowing you to simulate the everyday life of an infant.

Advantages :

- **Immersive learning**: Allows a realistic approach to childcare, offering a hands-on experience that helps to better understand the gestures and care to be given to an infant.
- **Comprehensive training**: Ideal for training in childcare, infant health or any other discipline related to infant care. It provides real-life practice before taking charge of a real baby.

- **Versatile**: It offers a wide range of care simulations, from bathing to medical examinations, enabling comprehensive and diversified training.
- **Safe and reliable**: Designed in compliance with safety standards, it enables users to practice in complete peace of mind, without risk.
- **Practical for everyday training**: Thanks to its mobility and lightness, it can be used both in training and at home, offering great flexibility.

Applications :

Professional training: Simulation tool for healthcare professionals (nursery nurses, pediatricians, midwives) or health school students.

Practical training: Ideal for nursery schools or training centers that need realistic support for their teaching programs.

Care simulation: Practical for learning childcare procedures such as bathing, changing, feeding, taking temperature, as well as routine medical examinations.

Parent support: A useful tool for expectant parents or those wishing to familiarize themselves with infant care.

The life-size male infant is an **indispensable tool** for anyone wishing to learn or perfect their childcare skills. Thanks to its realistic design and multiple functionalities, it enables **hands-on, immersive training**. Whether for healthcare professionals, students in training or parents wishing to prepare themselves for infant care, this tool **guarantees complete**, **safe learning adapted** to the daily needs of young children. Its realism, sturdiness and versatility make it the ideal choice for **effective and rewarding care simulation.**
