Manikin black skin infant care

The black skin-color infant care mannequin is a **faithful reproduction of a newborn baby**, specially designed for healthcare professionals, childcare students or anyone wishing to learn infant care techniques. With its movable joints, slightly open eyes and palpable fontanel, it offers a**realistic, interactive learning** experience**.**

This mannequin can be used to simulate various infant care tasks, such as dressing, undressing, washing and changing diapers, providing a learning platform for essential childcare gestures.

Features :

- **Realistic appearance**: The mannequin represents a black-skinned infant, with features and posture faithful to those of a newborn baby.
- **Moveable joints**: Allows great freedom of movement to reproduce care gestures and manipulate the baby in different positions.
- **Slightly open eyes**: For a realistic representation of the infant, bringing the mannequin to life.
- **Palpable fontanelle**: The infant's small fontanelles can be felt, helping to recognize this physical characteristic of newborns.
- **Suitable clothing**: This mannequin can be dressed and undressed in standard infant clothing.
- **Non-watertight attachments**: The mannequin's limbs are not watertight, which prevents complete immersion in water, but does allow washing care to be carried out.
- **Available:** female or male

Advantages:

- **Realistic learning**: Allows complete immersion in the gestures and care required to look after an infant, while providing a practical and educational approach.

- **Easy handling**: movable joints offer great flexibility for reproducing everyday gestures such as comfort care, diapering or dressing/undressing.
- **Risk-free practice**: This mannequin is designed for use in educational settings, with no risk of damage thanks to its sturdy, durable limb attachments.
- **Childcare training support**: Ideal for health schools, maternity wards or trainers, this mannequin offers an excellent working tool for learning infant care.
- **Adaptability**: Thanks to the possibility of fitting it with standard infant clothing, it's easy to dress and customize for different situations.

Use:

Infant care training: This mannequin is an ideal teaching tool for training future healthcare professionals, nursery nurses, or parents wishing to learn how to care for an infant.

Practical care simulations: Allows you to practice basic gestures such as diapering, bathing (washing), caring for a fragile infant and managing the toilet.

Support for demonstrations and workshops: Whether in a nursery school or during training workshops, this mannequin enables safe care demonstrations.

The infant care mannequin is an **essential tool for learning and training in newborn care.** With its high fidelity to reality, movable joints and palpable fontanel, it is an effective support for healthcare professionals, students and parents. Perfect for learning how to care for newborns, this mannequin is indispensable for anyone wishing to acquire the skills necessary for the well-being of infants.
