

Belt drive for rotation system - monitor Stream Master II (3480-3482 with handwheel)

Optimize the performance and durability of your monitor **AKRON Stream Master II 3480-3482** with this gear set specially designed for the belt drive mechanism. Suitable for models equipped with the **handwheel** option, this kit guarantees smooth movement and increased precision when orienting the monitor.

An essential kit for optimal operation

With time and intensive use, the rotation system of your monitor can wear out, leading to loss of efficiency and more difficult handling. This gear and belt kit will :

- **Restore the precision** of the rotational movement.
- **Improve the smoothness** of the drive mechanism.
- **Reduce premature wear** thanks to robust components.
- **Extend the life** of your equipment.

Why choose MMF Protection et Sécurité?

As **AKRON's main dealer and authorized repair center** in France, we put our expertise at your service:

- **Genuine AKRON parts** for maximum compatibility and reliability.
- **Technical assistance** to guide you through installation and maintenance.
- **Immediate availability** to guarantee rapid repair.
