Manikin adolescent water rescue

Aquatic rescue dummy for teenagers: realistic rescue simulation.

This rescue dummy is designed specifically for the aquatic training needs of teenagers. Thanks to its high-quality materials and meticulous design, it provides a realistic, functional simulation for pool or sea rescue exercises.

Made from **durable vinyl plastic**, it is both lightweight and robust, and stands up to the wear and tear of repeated use. The **rust-resistant stainless steel skeleton** guarantees the dummy's strength, even after numerous immersions. This mannequin is fully **articulated**, enabling fluid, realistic handling during simulations.

Features:

- **Main material**: High-quality vinyl plastic, offering durability and flexibility.
- **Structure**: Stainless steel skeleton, designed to resist rust and moisture.
- **Joints**: Fully articulated, enabling realistic simulation of movements.
- **Immersion**: Mannequin submerges up to the neck when filled with water.
- **Additional weight**: Requires the addition of 2 to 5 kilos of weight (not supplied), such as a brick, to guarantee optimal immersion.

Dimensions:

- Length: 127 cm
- Width: 61 cm
- Height: 30 cm

- Weight: 11 kilos

Advantages:

- **Realism**: The articulated structure enables fluid, realistic handling of the mannequin, giving teenagers an experience as close to reality as possible.
- **Durability**: Made from high-quality materials, this mannequin withstands intensive use and prolonged exposure to water.
- **Enhanced safety**: Its design, conceived to mimic a human body in a realistic way, enhances understanding of rescue techniques.
- **Ease of use**: The dummy can be quickly immersed in water thanks to its fill and weight system. So teenagers can practice rescue techniques with a tool that's easy to handle.
- **Suitable for training**: Perfect for training in schools, leisure centers, or swimming clubs, it enables instructors to simulate emergency situations and assess the skills of young lifeguards in training.

Applications :

The rescue manikin is a **valuable resource for teaching water rescue techniques**. Ideal for training teenagers, it can be used to :

- **Simulate aquatic emergencies**: The dummy allows you to rehearse rescue techniques under realistic conditions.
- **Improve lifesaving skills**: By practicing with this mannequin, teenagers can learn to recognize signs of distress and react quickly.
- **Boost confidence**: Young rescuers gain confidence in their ability to handle aquatic emergencies, knowing that their actions are practical and effective.
- **Optimize training**: By providing tangible support for training, it enables trainers to create diverse and realistic scenarios.

The **teenage water rescue dummy** is much more than just a training aid. It's an investment in the **safety**, **reality** and **quality** of water rescue training. Offering a **realistic simulation**, it enables teenagers to prepare effectively for aquatic emergencies.

Whether for **school courses**, **lifesaving workshops** or **intensive training sessions**, this manikin is the ideal tool for improving the skills of young lifeguards, while guaranteeing a safe, controlled environment.

With its **exceptional durability** and incomparable **realism**, the 1327 water rescue dummy is the perfect tool for any organization wishing to offer quality training to future lifeguards.
