

Manikin for men and women

Manikin of patient care.

manikin patient care is an indispensable training tool for healthcare professionals and nursing students. Designed to simulate real-life care situations, it helps develop a wide range of practical skills. This 20 or 57 kg articulated manikin is suitable for learning transfer techniques, body care and wound management, while providing a realistic and educational experience.

This realistic model is designed to reproduce basic and advanced care in a medical setting. Featuring fully articulated limbs, it allows realistic practice of patient manipulation and repositioning. Its detailed anatomy, with interchangeable male and female genitalia, offers a comprehensive teaching approach suitable for various types of care.

What's more, its smooth, washable vinyl skin ensures both durability and ease of maintenance.

- This manikin **comes with** a removable wig, which can be used to practice hair care and procedures such as shampooing or haircutting.
- **manikin dimensions:** 127 x 61 x 30.5 cm
- **2 possible weights:** 57 or 20 kilos

Features :

- **Articulated limbs:** All manikin limbs are mobile and can be positioned in various postures to simulate realistic patient handling.
- **Interchangeable genitalia:** Allows anatomy to be customized to suit training needs. Choice of male or female genitalia.
- **Smooth, washable vinyl skin:** Easy to maintain and clean, the durable, soft-touch vinyl mimics the texture of human skin.

- **Removable wig:** Convenient for hair care, such as shampooing, trimming, or specific hair care.

Advantages:

- **Hands-on learning:** This manikin allows students and healthcare professionals to practice in a variety of realistic conditions, from basic care (bathing, changing dressings) to more advanced techniques, such as patient manipulation and transfer.
- **Flexible training:** With articulated limbs and interchangeable genitalia, manikin can be adapted to a wide range of learning scenarios. This makes it possible to practice care for patients of different genders and situations.
- **Durability:** Its high-quality vinyl design guarantees a long service life, even after many training sessions.
- **Ease of transport:** Thanks to the optional soft carry bag, manikin is easy to move between different training locations, facilitating travel and field simulations.
- **Simple maintenance:** The vinyl material is easily washable, allowing quick maintenance after each training session.

Uses:

This manikin is an essential teaching resource for nursing schools, hospitals, and any healthcare facility offering hands-on training.

It enables you to :

Simulate daily care: Learn transfer, bathing and body care techniques in a controlled setting.

Practice advanced techniques: Train for more specialized care, such as changing surgical dressings or managing bedridden patients.

Improve communication and handling skills: Thanks to its realistic design, caregivers can better understand the importance of patient comfort and well-being during care.

Prepare for emergency situations: By simulating emergency and post-operative care scenarios, manikin prepares future caregivers to react appropriately in a real-life environment.

The manikin patient care system is a comprehensive, durable and versatile training tool. It offers a realistic experience and the flexibility to simulate a variety of medical scenarios. Whether learning basic care, patient transfer, or specialized procedures, this manikin is an excellent way to enhance the skills of healthcare professionals. With customization and convenient transport options, it is perfectly suited to the needs of training facilities and hospitals.
