

Manikin adult choking for HEIMLICH maneuver

Product features:

Aspect of manikin: Torse amovible

Age: Adult

Use: Heimlich maneuver

Reference: 21727

EAN13: -

Adult choking dummy with carry bag

The **Adult Choking Man** ikin is an educational tool designed for training in the management of airway obstructions using the Heimlich maneuver or other airway clearance techniques. It enables students to learn and practice the vital gestures to be performed when a person is choking. With this mannequin, learners can practice clearing an airway blocked by a foreign body, using abdominal thrusts or blows to the back, in a safe, controlled environment.

The object features a ribcage, xiphoid process, supra-sternal notch and removable foreign body to simulate airway obstruction. This manikin is ideal for first aid training, in schools, hospitals or during first aid certifications.

Features:

- **Anatomical design:** Includes anatomical landmarks such as a rib cage, xiphoid process and supra-sternal notch to help students accurately locate intervention areas.
- **Removable foreign body:** Realistic reproduction of an airway obstruction, to simulate choking.
- **Intervention maneuver:** Practice airway clearance maneuvers using abdominal thrusts or back blows.

- **Carrying bag included:** This mannequin comes with a shirt and soft bag for easy storage and transportability.
- **Weight and dimensions:** Weight of dummy with bag: 7.26 kg. Product dimensions: 76 x 43 x 25 cm.

Benefits:

- **Realistic training:** The presence of an object blocked in the airway and realistic anatomical landmarks enable a simulation close to reality, guaranteeing more effective and accurate training.
- **Ease of use:** The mannequin is designed for uncomplicated use, providing students with a clear and simple learning experience.
- **Safety and control:** Students can perform maneuvers without the risk of injuring a real person, and receive immediate visual feedback when the obstruction is removed.
- **Convenient transport and storage:** The manikin comes with a soft bag, making it easy to transport and store without taking up space.
- **Longevity:** Thanks to its robust design and three-year warranty, this mannequin offers extended use and a good return on investment.

Application:

First aid training: Ideal for training sessions on airway clearance maneuvers in choking situations. An essential tool for first aid certification training.

Teaching in schools or workplaces: Used in schools, hospitals, first aid training centers or companies to prepare individuals to react to choking situations.

Awareness-raising and preventive practices: Enables students to develop greater mastery of emergency response techniques, while gaining in confidence.

The adult choking dummy with carry bag is an indispensable teaching tool for all first aid training. It provides a realistic simulation of choking situations, enabling students to practice clearing the airway in a safe and controlled manner.

Thanks to its robust construction, anatomical design and ease of transport, it's perfect for educational institutions, healthcare professionals or any organization looking to train its members in lifesaving techniques. With a three-year warranty, this mannequin is a lasting investment for any organization involved in first-aid training.
