Manikin rescue and child release

Randy Jennifer" rescue and rescue simulation dummy for children.

Discover **the Randy Jennifer rescue dummy**, an **essential** tool **for first-aid training**. Designed to simulate interventions with children, this 122 cm mannequin represents a teenager aged 7 to 12. Articulated, it offers a sturdy construction, **ideal for long-lasting, repeated use**.

Features:

- **Size**: 122 cm
- **Weight**: 17 kg
- **Dimensions:** 48.3 x 40.6 x 22.9 cm
- **Includes:** Sweatpants and t-shirt

Benefits:

- **Rugged design**: Designed to withstand years of use, it's perfect for training facilities.
- **Realistic simulation**: Allows trainers to recreate child rescue situations, while taking into account the emotions involved.
- **Ease of handling**: Weighing just 17 kg, it is easy to handle for practical exercises.

Uses:

The Randy Jennifer rescue manikin is particularly suitable for:

Rescue and emergency teams (military, fire department, police force)

First-aid training in schools or specialized training establishments.

Practical rescue exercises in real-life situations, such as high-altitude rescue or rubble extraction.

Preparing responders for emotionally challenging scenarios involving children in distress.

This manikin is a lasting investment for all professionals looking for a reliable, robust and optimized training tool. It meets the requirements of first aid trainers and guarantees realistic and effective simulation of critical interventions.

The Randy Jennifer rescue manikin is **perfect for rescue training**, enabling trainers to **simulate real-life situations** and**improve responders' skills**. Its articulated design and robust construction guarantee prolonged use in a variety of environments.

These mannequins are designed to simulate highly **realistic** rescue situations, such as high-altitude rescue, rescue of children buried under rubble, simulated immobilization, ladder descent...etc.

They are essential tools for training exercises that are too dangerous or uncomfortable to perform with volunteers. Ideal for the military, fire departments, police forces and security and rescue services, these mannequins enable effective preparation for critical interventions.

Investing in the Randy Jennifer rescue dummy **ensures realistic and effective training** for rescue personnel. Its **meticulous design** and practical features make it an **essential tool** for all training establishments. By enabling responders to prepare for real-life scenarios, it helps build their confidence and competence, essential qualities in emergency situations. In short, Randy Jennifer represents a step forward towards more comprehensive, more humane first-aid training.
