

Manikin adult CPR training Brad

Adult trunk CPR training dummy with carry bag

The adult CPR training dummy is an economical model designed to simulate cardiopulmonary resuscitation (CPR) situations realistically and effectively. Made from soft vinyl plastic and mounted on polyurethane foam, this manikin ensures optimum grip during training sessions. Thanks to its advanced design, it enables you to work on chest compression and insufflation techniques in a safe and practical way.

The Brad manikin is perfect for CPR training in both educational and professional environments. It also includes a carry bag and knee pads, making it easy to move and use at different training locations. What's more, the latex-free design ensures user safety, minimizing allergy risks.

Features:

Product weight: 8 kg

Dimensions: 71.12 x 45.72 x 25.4 cm

Warranty: 3 years

- **Long torso:** Enables realistic abdominal thrusts, ideal for working on compression intensity.
- **Realistic head tilt and chin lift:** Opens the airway for better simulation of resuscitation.
- **Anatomical markings:** Sternum, ribcage and substernal notch clearly marked for easy identification of compression points.
- **Adjustable airway systems:** Easy to use to simulate airway obstruction or choking.
- **Disposable components included:** Three disposable airway systems/lungs and mouthpieces/nose for simplified maintenance.
- **Tested for over a million compressions:** Guarantees exceptional durability even under intensive use.
- **Practical accessories:** Carry bag and knee pads included for easy use and secure transport.
- **Latex-free:** Designed to avoid the risk of allergies and adverse reactions.

Benefits:

- **Realistic simulation:** Detailed anatomical features and the ability to manipulate the airway offer a more immersive learning experience.
- **Durability:** With over a million compressions tested, this manikin is designed to last, even in intensive training environments.
- **Convenience:** The inclusion of a carry bag makes it easy to move the manikin and keep all accessories organized.
- **Hygiene:** Disposable components, such as lungs and mouthpieces, guarantee a high level of hygiene and safety during training.
- **Safety:** The absence of latex in the manufacturing process protects users against potential allergies.

Use

The Brad CPR manikin is specially designed for first aid and cardiopulmonary resuscitation training. It is particularly well suited to schools, hospitals, training organizations and any structure requiring CPR simulation tools. This model is an excellent choice for teaching good chest compression and insufflation practices, enabling learners to acquire critical lifesaving skills.

The Brad adult CPR manikin is a reliable, durable and practical learning tool, ideal for cardiopulmonary resuscitation training. Its realistic design, accessibility with carry bag and practical accessories make it a complete solution for trainers and institutions alike. Thanks to its robustness and optimal hygiene, it meets all the requirements of first aid training while offering a safe, realistic learning experience.
