Set with crown lifebuoy

Crown lifebuoy case

The SOLAS crown buoy with case is a marine safety device designed for use at sea and in inland waters such as lakes and rivers. Compliant with SOLAS (Safety of Life at Sea) standards, this lifebuoy is an essential element in ensuring the safety of people at sea, while being particularly visible and easy to use thanks to its reflective features and protective case. This model is ideal for installation on coasts, docks, or in access areas to bodies of water.

Package contents:

Set includes :

SOLAS Ø 73 cm crown buoy: Complies with SOLAS standards, with retroreflective strips for optimum visibility.

Throwing line: Allows the buoy to be easily thrown to a person in difficulty at sea or in inland waters.

Polyethylene**protection** and signaling**box**: This durable box protects the buoy from the elements and clearly signals its presence for quick access.

Features :

- **SOLAS standard**
- **Ø 73 cm buoy** in high-strength polyethylene for optimum buoyancy
- **Retroreflective strips** for enhanced visibility day and night
- **Peripheral thread** for better grip
- Polyethylene**protective case** with signage design for secure storage
- **Total weight**: 11.83 kg
- **Case dimensions**: 85 cm (W) x 90 cm (H) x 28 cm (D)
- **Wall-mounting** option for fast, convenient access

Benefits :

- **SOLAS-compliant** : Approved to SOLAS standards, this buoy ensures maximum safety at sea and in inland waters.
- **High visibility**: Retroreflective strips and a sign box ensure maximum visibility, even in low-light conditions.
- **Sturdiness and durability**: Manufactured in polyethylene, the buoy and its box are designed to withstand extreme weather and water conditions.
- **Ease of use**: The jet line and peripheral die make the buoy easy to use and launch.
- **Protection and signage**: The case protects the buoy from the elements, yet makes it easily accessible.
- **Flexible installation**: The box can be attached to a variety of supports, offering great installation flexibility (walls, poles, tubes).

Applications :

Maritime safety: Indispensable in port facilities, marinas and on beaches, the SOLAS crown buoy is designed for use in rescue situations, to save lives.

Inland waters: In addition to sea applications, it can be used in rivers, lakes or any other inland body of water where the safety of users must be ensured.

Easy to locate: The signal box makes it easy to identify the buoy in an emergency, enabling rapid intervention by the emergency services.

Durability: Thanks to its high-quality materials, this buoy guarantees reliable performance even after prolonged exposure to harsh environmental conditions.

The SOLAS crown buoy with case is an **essential piece of equipment for ensuring the safety of water users**. Its compliance with **SOLAS standards**, enhanced visibility thanks to retro-reflective strips, and protective case make it the perfect choice for maritime professionals, beach safety managers and any installation in high-risk areas. **Robust, practical and efficient**, this buoy is designed to be easily accessible and to stand the test of time and harsh conditions.
