Support post for buoy box

Pole support for buoy box

This 1.5 m-high pole is specially **designed for the installation of a crown buoy box**, offering a **practical, sturdy solution** for securing your equipment along the coastline, a river or near a lake or body of water. It's ideal for marine or aquatic environments, offering **simple, secure installation** for a variety of beaconing or signage applications. **Designed to withstand outdoor conditions,** this post combines strength and durability.

Features :

- **Height:** 1.5 m
- **Section:** 60 x 40 mm
- **Weight:** 7.97 kg
- **Overall dimensions:** 300 x 300 x 1500 mm
- **Depth:** 30 cm
- **Length:** 150 cm
- **Materials:** Galvanized steel or other weather-resistant material (specific details to be defined according to manufacture)
- **Color:** Natural (can be painted according to needs or specifications)

Benefits:

- **Strength and Resistance**: Made from robust materials, this post is designed to withstand extreme weather conditions, including humidity and prolonged exposure to sunlight.
- **Ease of installation**: With a height of 1.5 m and compact dimensions, it integrates easily into a variety of outdoor environments, and adapts to different types of crown buoy boxes.
- **Adaptability**: This pole can be used for a wide range of applications, from marking out safety zones and signalling hazards, to installing floating equipment in water sports areas.

- **Durability**: Its galvanized steel construction ensures protection against rust and a long service life, even in salt or fresh water.
- **Aesthetics and Discretion**: The pole features a simple, unobtrusive design that blends harmoniously into the natural landscapes of coastlines, rivers or lakes.
-

Applications :

Beaconing and safety: Used to install crown buoys, it can be used to mark swimming areas, boat passages or danger signage zones.

Installation of floating equipment: This pole is perfect for holding in place a box or crown buoy that can be used to mark specific areas or as an anchoring point for floating equipment.

Close to water: Whether by a lake, a river or along the coastline, it offers a reliable solution for securing the environment and ensuring optimum visibility of nautical installations.

Weather-resistant: Particularly suited to outdoor environments where it will be exposed to the elements, such as humidity and salty water.

The 1.5 m pole for crown buoy box is the ideal solution for ensuring safety and visibility in aquatic environments. Its sturdy design, easy installation and high weather resistance make it the preferred choice for coastal or waterside installations. Whether you're looking to secure a swimming area, mark a passageway for boats or fix floating equipment, this post meets the needs of professionals and private individuals looking for a reliable, durable solution.

Investing in this post guarantees a safe, long-lasting installation, while optimizing the aesthetics of your nautical space.
