Horseshoe lifebuoy

Removable horseshoe buoy

This lifebuoy is **designed for optimum safety at sea or in inland waters.** With a buoyancy rating of 147 N, it **provides effective assistance** in the event of drowning or other emergencies. Its polyethylene foam **guarantees long-lasting buoyancy,** while its PVC-coated fabric cover, both resistant and washable, protects against external aggression. The cover's zip fastening makes it **easy and convenient to use**. What's more, its wide opening adapts to a wide range of body sizes. Supplied with a complete device, including a flip-over light, integral die and polyamide carabiner, this buoy meets **strict safety standards** to ensure fast, reliable intervention.

Features:

- **Buoyancy**: 147 N, ensured by polyethylene foam, guaranteeing effective buoyancy for rescue operations.
- **Cover**: PVC-coated fabric, renowned for its high resistance and durability. It is also washable for easy maintenance.
- **Closure**: Zippered, for easy storage and protection of the buoy.
- **Opening**: Wide, suitable for virtually all body sizes, ensuring quick and easy set-up.

Accessories included:

- Integral thread.
- Polyamide snap hook for easy attachment.
- A reversing light to signal the presence of the buoy in case of need.
- A stainless steel wire support to guarantee the system's strength and durability.

Dimensions :

Weight: 0.86 kg

Height: 43 cm

Width: 62 cm

Thickness: 11 cm

Volume: 40,920 cm³ (or 40.92 L)

Item length: 62 cm

Item depth: 55 cm

Item height: 12 cm

Uses:

This horseshoe buoy is designed to be used as part of safety measures at sea, particularly for ships and boats:

- **Keeps a person afloat** while awaiting rescue.
- Serves as**safety equipment** on board boats.
- Fitted with a **reversing light** for maximum visibility.
- **Stainless steel support** for strength and durability in tough conditions.

This horseshoe buoy is essential safety equipment for all nautical activities, meeting French regulatory requirements (division 240). With a buoyancy rating of 147 N, a high-strength PVC cover and a design to suit a variety of body sizes, it offers great reliability and durability in maritime conditions. Included accessories, such as the polyamide carabiner, flip-over light and stainless steel bracket, further enhance its efficiency and practicality. Easy to maintain thanks to its washable, compact cover (0.86 kg), this buoy is ideal for guaranteeing the safety of people on board or during interventions at sea. Its orange visibility color also ensures rapid identification in emergency situations. A perfect choice for those looking for reliable, standards-compliant lifesaving equipment.
