Stainless steel support for crown buoy

Stainless steel crown buoy bracket - balcony or rail mounting

The stainless steel crown buoy bracket for balcony or rail mounting is a simple and effective solution for **securely attaching a crown buoy** to a balcony tube or stanchion. Designed for tubes with **diameters between 18.5 and 25.5 mm,** this bracket is **ideal for installations in marine environments or near water**, such as on boats, yachts or docks.

Made from **sturdy**,**weather-resistant materials**, it ensures a **secure hold** while facilitating access to the buoy should the need arise. This bracket comes complete with everything needed for quick and easy installation, guaranteeing a **reliable solution** for user **safety**.

Features :

- **Compatible with tubes from Ø 18.5 to 25.5 mm**: The bracket adapts to different tube diameters, making it highly versatile and compatible with a wide range of equipment and structures.
- **Plastic and stainless steel structure**: The holder is made up of a plastic Plasticlip, a stainless steel wire to receive the buoy and a rubber bungee cord with a plastic snap hook to hold the buoy in place.
- **Easy installation**: supplied with fixing screws for fast, secure installation.
- **Weatherproof**: Designed to withstand humidity, salt water and temperature variations, this bracket is perfectly suited for outdoor use, particularly in marine environments.

Advantages :

- **Easy to install**: The bracket comes complete with everything needed for rapid assembly, saving precious time during installation.
- **Secure**: The attachment system with bungee cord and plastic snap hook holds the lifebuoy firmly in place, ensuring immediate accessibility in the event of an emergency.
- **Adaptable**: It can be used on a variety of structures such as balconies, stanchions or other supports with tube diameters ranging from 18.5 mm to 25.5 mm.
- **Durability**: The choice of quality materials (plastic and stainless steel) ensures long life, even in difficult

conditions (exposure to salt, weather, etc.).
- **Practical**: The compact, ergonomic design enables discreet yet sturdy attachment, while keeping the buoy within easy reach without excessive bulk.

Applications:

This bracket is ideal for any installation where safety at sea or around bodies of water is a priority. Thanks to its design, it provides a reliable and accessible means of securing a crowned lifebuoy, essential for rapid response in emergencies. Particularly suitable for :

Boats: easy attachment of the buoy to stanchions or the boat's balcony.

Docks and piers: Installation on metal or wooden dock structures for immediate access to the buoy.

Public or private areas near water: Ensure safety in swimming pools, beaches or other aquatic areas, while complying with safety standards.

The Crown lifebuoy holder is a **practical**, **robust** and **easy-to-install product**, designed to meet safety requirements in aquatic environments. Suitable for a wide range of tube diameters, it guarantees **reliable** buoy **attachment** and makes it easy to use in an emergency. Thanks to its construction in resistant materials and its ease of assembly, this bracket is the ideal choice for ensuring safety on the water, whether on a boat, dock or any other area requiring rapid access to a lifebuoy.
