

Belt lifebuoy with mouth-to-mouth mask

Rescue belt buoy

This innovative belt lifebuoy is designed for **safe, effective rescue in the water**. Made from self-sealing closed-

cell expanded polyurethane, it **ensures optimum buoyancy and withstands the stresses of use**. Thanks to its **"horseshoe" design**, the buoy completely envelops the victim, enabling rapid, safe rescue. Its **carabiner fastening** system and flexibility enable it to adapt to all body shapes, offering **maximum flexibility** for effective rescue. What's more, an integrated housing allows the insertion of a mouth-to-mouth mask with unidirectional valve and hydrophobic filter, optimizing resuscitation interventions.

The buoy is also **equipped with ergonomic handles** that make it easier for the rescuer to hold, and two elastic straps for attaching a pair of fins, increasing the rescuer's mobility. An ideal choice for rescue teams, beaches, swimming pools or any other aquatic environment.

Features:

- **Dimensions:** 1200 x 170 x 80 mm
- **Weight:** 2 kg
- **Body material:** Self-foaming closed-cell polyurethane foam (for optimum buoyancy)
- **Handle material:** Polyester (providing a firm, comfortable grip)
- **Color:** Yellow (high visibility for rapid intervention)
- **Pocket mask case color:** Blue (for easy identification)
- **Additional components:** Carabiner for secure closure; CPR mask holder with one-way valve and hydrophobic filter; Two elastic straps for attaching fins

Benefits :

- **High buoyancy:** Thanks to closed-cell expanded polyurethane, the buoy offers excellent buoyancy and strength, enabling fast, safe rescue even in difficult conditions.
- **Flexibility:** The buoy adapts perfectly to all body sizes, thanks to its flexibility and carabiner fastening system. This means it can be used on a wide variety of victims.
- **Ergonomic handles:** Sturdy, ergonomic handles provide an easy, secure grip, making it easy for rescuers to use, even in emergency situations.
- **Inclusion of CPR mask:** The mouth-to-mouth mask holder with one-way valve and hydrophobic filter enables safe resuscitation, with an accessory directly integrated into the buoy.
- **Fins attachment:** Elastic straps can be used to attach fins, optimizing the rescuer's mobility in the water.
- **Optimum visibility:** the bright yellow color guarantees maximum visibility, which is essential in emergency situations, particularly on the beach or at sea.

Applications:

This lifebelt buoy is particularly useful in high-risk aquatic environments, where speed and safety of rescue are paramount. It is ideal for :

Beaches: to ensure the safety of bathers and facilitate the intervention of lifeguards at sea.

Swimming pools: An indispensable tool in sports and public facilities for rapid rescue operations.

Rescue teams: For aquatic rescue professionals, it enables them to effectively secure the victim while providing

assistance with resuscitation (CPR).

Boats and ships: Practical for emergency situations at sea, it enables rapid rescue of a shipwrecked person or a victim who has fallen overboard.

The lifebelt buoy with handles and CPR mask pocket is a **complete, versatile device** that ensures both the victim's safety and the rescuers' efficiency. Its flexible design, ergonomic handles, CPR mask pocket and fin attachment capability make it an essential choice for all water safety professionals. With its high visibility and quality materials, it guarantees **fast, safe interventions**, whether at sea, in the pool or on the beach. A must-have accessory for optimal response to drowning or aquatic incidents.
