Vomix vomitory bag, pack of 25 units

The **Vomix** is an emesis bag designed to collect vomit safely and hygienically. Each pack contains 25 bags with a transparent plastic bag, an integrated funnel and a non-return valve to prevent spillage. Graduated for easy identification of blood in vomit or urine. Single-use, it is packaged in a paper envelope and features a 1-liter capacity.

Features :

- **Capacity:** 1 liter.
- **Transparency and graduation**: Allows visualization and identification of the presence of blood.
- **Components:** Plastic bag, funnel, non-return valve.
- **Standard:** Complies with NF EN 1789 (emesis bag).
- **Packaging:** Pack of 25 bags, each in a paper envelope.
- **Compact dimensions:** Easy to store in sanitary vehicles.

Advantages :

- **Hygienic and safe:** The non-return valve prevents spills and reduces the risk of contamination.
- **Ease of use:** Integrated funnel for fast, clean collection.
- **Versatility:** Suitable for emergency services, ambulances and fire departments.
- **Compact and practical:** Takes up no space and is easy to store.

Use:

The Vomix is essential for healthcare professionals in ambulance vehicles. It enables vomit to be collected quickly and hygienically, while complying with European standards. Thanks to its graduated capacity, it helps identify clinical signs such as the presence of blood.

The **Vomix** is a **compact**, **hygienic** vomit bag, ideal for emergency interventions. Its ease of use and compliance with standards make it a must-have product in medical vehicles, ensuring **safety** and **efficiency.**
