FLACON 200 ML PH NEUTRAL PLUM 4752(4,9 % phosphate buffer) - neutralizing solution

Flacon 200 ml pH Neutral Plum 4752: Effective safety for your eyes

The 200 ml pH Neutral Plum 4752 bottle is an essential piece of equipment for ensuring safety and eye protection in professional environments. Designed with a 4.9% phosphate buffer, this bottle is particularly effective at rapidly neutralizing even the strongest acids and alkalis. Its contents are phosphate salts, naturally present in the human body, ensuring safe and effective rinsing.

This product has its origins in the renowned Plum eyewash range, specially developed to meet the demands of industrial and laboratory environments. It is also compact and easily transportable, allowing it to fit neatly into a belt bag, first-aid kit or toolbox. This ensures that it's always at hand in the event of an accident.

For safety-conscious professionals, the 200 ml pH Neutral Plum 4752 offers a reliable and practical solution. Being sterile and supplied with a dust cap ensures a long shelf life, while its ergonomic design facilitates rapid use in an emergency. What's more, the CE mark underlines compliance with European safety standards, a further guarantee of quality and reliability for your eye safety equipment. Opting for this bottle means choosing peace of mind when faced with the risk of chemical accidents.

200 ml pH Neutral bottle PLUM 4752: Instant, effective eye protection

The **200 ml pH Neutral bottle PLUM 4752** is an essential choice for professionals seeking to optimize safety in the workplace. - CE-marked**shelf life** of 3.5 years
- **Practical design** for fast, easy opening

200 ML PH NEUTRAL BOTTLE PLUM 4752: Multiple professional uses

The 200 ml pH Neutral Plum 4752 bottle is a must-have in a variety of professional environments, thanks to its effectiveness in rapidly neutralizing acids and alkalis. This product is ideal for industrial sectors where chemical risks are frequent. Employees working in chemical processing plants, research laboratories and metalworking shops could all benefit greatly from this eyewash. It offers a practical, rapid solution to accidents involving splashes of corrosive substances.

In the medical field, staff in clinics and hospitals, where exposure to chemicals is frequent, can count on the safety provided by these bottles. They are designed to prevent and mitigate the effects of accidental contact with aggressive products, even in emergency situations.

Aviation and automotive professionals are also exposed to similar hazards. Mechanics working on engines and other complex equipment need quick access to effective rinsing solutions, which is what the 200 ml pH Neutral Plum 4752 bottle offers. Similarly, in repair and maintenance workshops, having bottles to hand can be decisive for staff safety.

Finally, for teachers and students at universities and technical colleges, a safe learning environment is paramount. Eye rinsing solutions, such as the pH Neutral bottle, not only guarantee safety, but also promote risk-free education. In short, the 200 ml pH Neutral Plum 4752 bottle is suitable for a wide range of professional environments, ensuring adequate protection against chemical hazards on a daily basis.
