# Empty station 4651 PLUM for eyewash bottle

The Plum 4651 empty wall station is a practical, functional device for storing and keeping your eyewash bottles close at hand. Designed in impact-resistant polystyrene, it ensures optimum bottle protection in high-risk working environments, particularly in production areas.

## Features :

- **Material:** Impact-resistant polystyrene
- **Dimensions**
  - Height: 280 mm
  - Width: 230 mm
  - Depth: 110 mm
- **Capacity:** 2 x 200 or 500 ml bottles
- **Compatible bottle types:** Eye wash, pH neutral or saline
- **Installation:** Wall-mounted for fast, convenient access
- **Ease of maintenance:** Bottles can be replaced after use to maintain hygiene

## Benefits and uses :

- **Improved safety:** Allows eyewash bottles to be quickly located in production or work areas, ensuring rapid intervention in the event of an eye accident.
- **Durable and robust:** Made from impact-resistant polystyrene, it guarantees a long service life even in tough working conditions.
- **Practical and functional:** Easy to maintain and use, simply replace the bottles after each use to keep it ready for use.
- **Space-saving:** its wall-mounted installation optimizes space while keeping vials accessible and visible.

The Plum 4651 wall-mounted station is an ideal solution for work environments requiring fast, efficient safety. Its robust design, ease of maintenance and ability to keep vials within easy reach make it an essential choice for rapid response to eye accidents.
