

## Salvequick dressing dispenser CEDERROTH 490700

The **Salvequick** automatic dressing dispenser from **CEDERROTH** is an innovative and practical solution for fast, hygienic dressing management. This model is designed to facilitate the use of dressings, while protecting them from dust, moisture and dirt. Thanks to its automatic system, dressings are always ready for use, ensuring a quick pick-up when needed, while avoiding waste thanks to its refill locking mechanism. With its compact size and ergonomic design, this dispenser can be installed in any environment, whether domestic, professional or medical.

### Features :

- **Dimensions:** Width 23 cm, Height 12 cm, Depth 5.5 cm
- **Contents**
  - 40 textile dressings
  - 45 plastic dressings
- **Locking system:** Refills are protected by a locking mechanism, preventing theft and wastage.
- **How to use:** The dressing is easily accessible by pulling downwards, thus avoiding soiling other dressings in the dispenser.
- **Opening mechanism:** A red key is included to remove refills and prevent unauthorized access.
- **CE labelling:** The products inside the dispenser are CE-certified, guaranteeing compliance with safety and quality standards.
- **Storage:** Store at room temperature in a dry place, preferably in their original packaging until use.

### Advantages :

- **Convenience:** The dispenser allows one-handed use to apply the dressing, offering a quick and hygienic solution for wounds.
- **Optimum protection:** Dressings are protected from dust, moisture and dirt until they are used, ensuring maximum effectiveness.
- **Economy:** The refill locking system prevents wastage and secures dressings in high-traffic environments.
- **Security:** Dressings are securely stored and cannot be removed without the supplied key, ideal for preventing theft in public or professional spaces.
- **Compliance:** The dressings and dispenser comply with healthcare standards, thanks to their CE certification, ensuring superior quality for medical use.

## Use:

The **Salvequick CEDERROTH** automatic dressing dispenser is particularly useful in a number of contexts:

- **Professional environments:** Ideal for work environments such as factories, workshops, offices, where fast, convenient care is needed.
- **Medical establishments:** Hospitals, clinics and nursing homes can benefit from this system to provide dressings quickly and hygienically.
- **At home:** For families, this dispenser keeps dressings accessible and clean in the event of injury.
- **Public areas:** Perfect for busy places such as schools, gyms and airports, where fast access to dressings while maintaining impeccable hygiene is crucial.

The **Salvequick CEDERROTH** automatic Dressing Dispenser is the ideal solution for fast, hygienic and safe dressing management. Whether in a professional or domestic environment, it offers simple, fast and convenient operation, while protecting dressings from dust and moisture. With its locking system, it prevents waste and theft, making this dispenser a complete solution for wound care. Its compact design and compliance with safety standards make it an essential choice for anyone concerned with efficiency and hygiene in daily care.
