Cederroth eyewash bottle holder 500 ml 7200

The Cederroth wall-mounted bottle holder (Part No. 7200) is a practical, sturdy holder designed to hold a 500 ml Cederroth Eyewash bottle (Part No. 725200) in place. This innovative system provides a secure, practical hold for the bottle, while ensuring immediate use in an emergency. When removed from the wall-mounted holder, the bottle opens automatically for instant rinsing. This wall-mounted bottle holder is ideal for all types of workplaces, whether in laboratories, workshops or vehicles, and can be mounted on a variety of vertical surfaces. It comes with a photoluminescent instruction panel, guaranteeing optimum visibility even in low-light conditions.

Features:

- **Compatibility:** Cederroth 500 ml Eye Wash Bottle
- **Material:** Hard, resistant plastic (green)
- **Dimensions:** Length 9 cm, Height 27 cm, Depth 7 cm
- **Installation:** Mounting on any vertical surface (wall, laboratory bench, vehicle, etc.)
- **Visibility:** Photoluminescent instruction panel included
- **Functionality**: Automatic bottle opening system as soon as it is removed from the holder
- **Security system:** Anti-theft, the vial cannot be returned to the vial holder once removed
- **Use:** Guarantees a safe, accessible storage solution for Cederroth eyewash products

Advantages:

- **Quick access:** In an emergency, the eyewash bottle is immediately ready for use, without complex handling.
- **Enhanced safety:** The bottle opens automatically when it is removed from the bottle holder, ensuring rapid activation of the eyewash in the event of chemical splashes or other contaminants.
- **Convenience:** Easy, flexible installation on any vertical surface. Ideal for use in high-risk areas such as laboratories and workshops.
- **Optimum visibility:** The photoluminescent instruction panel ensures that the location of the vial holder is easy to spot, even in poorly lit environments or under stress.
- **Theft protection:** The vial cannot be re-inserted into the vial holder once removed, preventing theft or

misuse of the safety equipment.

Use:

The Cederroth wall-mounted vial holder is essential in work environments where the risk of eye accidents is high. Its installation ensures that the eyewash bottle is always within easy reach, clearly visible and ready for use. It's particularly suitable for industries, laboratories, workshops, or any other place where chemicals or irritants are handled. This wall-mounted holder is also an excellent way of ensuring compliance with safety standards in the workplace, facilitating rapid intervention in the event of an accident.

Recommendations for use :

For maximum safety, we recommend installing two flask holders side by side. In the event of an accident, it's possible that both eyes could be affected, and having two vials means that each eye can be treated quickly and effectively. What's more, this set-up ensures rapid access to the product, even in extreme emergency situations.

The Cederroth wall-mounted vial holder (Ref: 7200) is an indispensable tool for ensuring optimum safety in high-risk environments. With its automatic opening system, photoluminescent visibility and flexible installation, it provides a reliable and practical solution for storing and quickly using Cederroth 500 ml eyewash. This wall-mounted holder contributes to effective safety practices and can play a crucial role in preventing serious eye injuries.
