Peli 1495 waterproof carrying case

Since 1976, Peli™ Protector cases have offered an unrivalled protection solution for sensitive equipment, even in the most extreme conditions. Designed and manufactured in the USA, they are the ideal option for those who need to protect their electronics and equipment in harsh environments, whether traveling, on a mission, or transporting over difficult terrain. Peli™ cases are renowned for their ruggedness, waterproofing and ability to withstand extreme weather conditions - from freezing cold to scorching heat.

Features:

- **Rugged, waterproof design:** made from high-strength plastic, these cases are built to last and protect against water, dust and impact.
- **Dimensions: interior:** 47.9 x 33.3 x 9.7 cm , **exterior:** 54.9 x 43.8 x 12.4 cm
- **Pick N Pluck™ system:** rolled foam for the lid, allowing you to customize the case's interior and adjust the space to suit your needs.
- **Automatic pressure-balancing valve:** This innovative valve balances the suitcase's internal pressure, preventing any water ingress while compensating for pressure changes.
- **3-digit padlock included:** Secure your belongings with the case's integrated padlock.
- **Overmolded folding rubber handle:** For comfortable, ergonomic transport, while providing a firm grip.
- **Easy-opening double-turn locks:** A simple, effective locking system designed for easy opening.
- **Stainless steel padlock protector**: For added protection against corrosion and wear.
- **Detachable shoulder strap:** For easier, more versatile carrying, adjustable to your convenience.

Advantages:

- **Maximum protection for your equipment:** Peli™ Protector cases offer absolute protection against weather, shock and dust, ideal for fragile equipment.
- **Resistance to extreme conditions:** these cases are designed to withstand the harshest environments, whether in the intense heat of the desert or in extreme cold conditions.
- **Ease of use:** Thanks to its safety, handling and customization systems (Pick N Pluck™), the case offers an optimal user experience, while guaranteeing effective protection.
- **Compression system and sealing:** The pressure-balancing valve and O-ring ensure that moisture and water remain on the outside, while enabling internal pressure management.

Application:

- **Professional transport:** Ideal for professionals transporting fragile electronic equipment, such as laptops, cameras, measuring instruments and more.

- **Travel & Expedition:** For those who travel to geographical areas with difficult climatic conditions, or who face risks of humidity and dust.
- **Sensitive industries:** Used in sectors such as the military, photography, earth sciences, or any other field requiring protection of equipment in hostile environments.

The Peli™ Protector protective case is an essential solution for those who require reliable, robust protection for their equipment in the most extreme environments. Its innovative design, water resistance and ability to withstand shock and pressure variations make it ideal for professionals and adventurers alike. Don't compromise the safety of your equipment - choose Peli™ for unrivalled protection.
