

4-piece foam for Peli™ 1300 case

Custom kit for Peli™ suitcase- Compatible with 1300 Protector Case

The Custom Kit is an easy-to-install system for customizing the interior of your **suitcase**. It's designed to offer optimum protection for your equipment thanks to layers of foam pre-cut into small cubes. Ideal for securing your equipment during transport, this kit fits perfectly into the **1300 Protector Case**. With quick and easy installation, you can create a tailor-made space for every object you wish to transport, guaranteeing both stability and protection.

Product features :

- **Foam type:** Polyurethane
 - **Compatible with:** 1300 Protector Case
 - **Ease of use:** Quick customization with pre-cut cubes to fit the inside of your case.
 - **Properties:** Durable foam, resistant to shock and compression.
-
- **Foam dimensions:**

Convoluted foam (for lid): 3 cm thick

Solid foam (for base): 1.4 cm thick

Pick N Pluck foam (for bottom): 2 x 5.6 cm thick, with 1.27 cm (0.50" x 0.50") cubes

Custom kit benefits:

- **Maximum protection:** High-quality **polyurethane** foam ensures optimum protection for your fragile equipment. Layers of convoluted, solid foam provide perfect insulation against impact and vibration during transport, minimizing the risk of damage.
- **Easy customization:** The **Pick N Pluck** system makes it easy to customize the interior of your transport box by removing the foam cubes as required. This ensures a perfect fit for every piece of equipment and optimizes space.

- **Compatible and practical:** Designed specifically for the **1300 Protector Case**, this kit adapts perfectly to the structure of the case, offering you a simple and effective solution for organizing your tools, electronic devices, or any other valuables.
- **Durability:** The kit is built to last, thanks to robust materials that resist wear and tear and tough transport conditions. The foam is shock- and compression-resistant, ensuring that your equipment remains intact even in extreme conditions.

Usage:

Installation steps :

1. **Preparing the case:** Open your **1300 Protector Case** and remove any pre-existing foam if necessary.
2. **Equipment positioning:** Lay out your devices inside the box to determine their placement. Use tape or chalk to mark the location of each item.
3. **Cutting and removing cubes:** Depending on the marks made, remove the pre-cut foam cubes using your fingers or a precision tool to adapt the inside of the box to your specific needs.
4. **Checking protection:** Make sure each object is securely fastened, with at least one centimeter of foam between the equipment and the walls of the box for optimum protection.
5. **Closing the box:** Once all your equipment is correctly installed, close the box and make sure everything remains stable during transport.

The **customized foam kit for 1300 Protector Case** is an ideal solution for anyone looking to secure their fragile equipment on the move. Easy to install and highly customizable, it guarantees maximum protection thanks to high-quality materials. By opting for this kit, you can ensure meticulous organization and enhanced security for your precious items. Whether you're a photographer, sound professional or adventurer, this kit is a reliable choice for all your transportation needs.
