

Simplified cap with handle and chain

Simplified plug with handle and aluminum chain

The **Guillemin aluminum coupling** complies with **NF E 29-572 PN16** and **EN 14420-8** standards, and is an essential accessory for the safe assembly of fluid transfer lines. It features a **simplified plug** with **ergonomic handle** and **safety chain**, guaranteeing easy handling and optimal storage.

Made from high-quality aluminum, this fitting is **lightweight, robust and corrosion-resistant**, making it an ideal choice for demanding industrial applications.

Features :

- **Standards:** NF E 29-572 PN16 and EN 14420-8
- **Material:** High-strength aluminum
- **Type:** Simplified plug with handle and chain
- **Pressure rating:** PN16
- **Available diameters:** Several sizes adapted to industrial needs
- **Secure attachment:** Guillemin system for fast, reliable connection

Advantages of a simplified plug with handle and aluminum chain :

Increased safety: Integrated chain prevents cap loss.

Ease of use: Ergonomic handle for a comfortable grip.

Lightweight and robust: Aluminum designed to withstand mechanical stress and corrosive agents.

Standards compliance: Ensures optimum compatibility with regulated industrial systems.

Adaptability: Compatible with a variety of pipe types for transporting liquids and gases.

Application:

The **Guillemin aluminum fitting** is mainly used in the following sectors:

- **Chemical and petrochemical industry:** Securing fluid transfer circuits.
- **Agriculture and irrigation:** Reliable connection for watering and pumping systems.
- **Transport and logistics:** Used on tankers and tanker trucks for the safe transfer of liquids.
- **Marine:** Suitable for pumping and draining systems on ships.

The **Guillemin aluminum coupling** is an indispensable component for ensuring safe, reliable connections in many industrial sectors. Its **simplified cap with handle and chain** makes it a practical and durable piece of equipment, complying with current standards.
